

**A
PROJECT REPORT
ON
“CAMPUS MANAGEMENT SYSTEM”**

**Submitted
To
Vishwabharti Girls Institute of Commerce Management &
Computer Application**

**Affiliated
To
VEER NARMAD SOUTH GUJARAT UNIVERSITY, SURAT**

**As A Partial Fulfillment For The Degree Of
BACHELOR OF COMPUTER APPLICATION (B.C.A.)
T.Y.B.C.A. (SEM. - 6)
ACADEMIC YEAR: 2024-25**

DEVELOPED BY:

1) Student Name:- Vaghasiya Sneha (SEAT NO. :6880)

GUIDED BY:

Prof.:- Miss.Punam Patel

**:: PROJECT DEVELOPED AT::
Vishwabharti Girls Institute of Commerce Management &
Computer Application
[Morthana]**

Managed By Madhav Education Trust

(Regd.NO.: E / 7744 / Surat Dt. 20-5-2015)

**Vishwabharti Girls Institute of Commerce
Management &
Computer Application**

Affiliated To Veer Narmad South Gujarat University Surat

At.Po:-Morthana, Simadi-Kosmadi Road, Ta:-Kamrej, Dist:-Surat, Pin-394325. Mo.: 7863864800

Bachlore of Computer Application

(B.C.A)[self-financed]

CERTIFICATE

*This is to certify that the project work carried out at VBGC,Morthana and recorded in this report is the bonafide work of **Vaghasiya Sneha k . (Exam No. : 6880)** of bachelor of computer Application semester VI, and has been successfully carried out by her as partial fulfilment towards The Degree of B.C.A, under our guidance during the academic year 2024-2025.*

*She was involved in a project for about eight weeks and was responsible for the design and development of **Campus management System** at collage as in-house Project.*

Miss. Punam Patel

(Internal Examiner)

(External Examiner)

Mr. Vinodbhai Gajera

*Principal
Vishwabharti Girls Institute of Commerce
Management & Computer
Application,Morthana*

Mobile no.	+91 93132 61642
Study center	Vishwabharti Girls Institute of Commerce , Management and Computer Application
Exam no.	6880
Academic Year	2024-25

ACKNOWLEDGEMENT

I am greatly thankful to **Vishwabharti Girls College** for giving me the opportunity to develop the project named "**Campus Management System**" undertaken during the 6th semester of BCA. I extend my humble thanks to all professors and staff members of the college for their cooperation and the keen interest they showed throughout my degree course. It is the foundation they have built that sustains such good work.

My sincere thanks go to **Mr. Vinod Gajera**, Principal of The Madhav Education Trust, and **Mrs. Karishma Patel**, Head of Department, College of Computer Application, for providing academic help throughout the BCA course.

I deeply owe my gratitude to my project guide **Miss Punam Patel** and other faculty members for their kind help throughout this project, which ensured that the missing pieces were found and put in place. I cannot fully express my gratitude to my guides and other faculty members without their moral support and encouragement.

Last but not least, my heartfelt appreciation goes to all those not named here, who have rendered their cooperation, directly or indirectly, in the development of this system and preparation of this document.

Thank you to all

Vaghasiya Sneha k.

ABSTRACT

The **Campus Management System** is a comprehensive web-based solution designed to streamline the management of **schools, colleges, and hostels**. The system aims to digitize and automate various administrative tasks, including student admissions, academic records, attendance tracking, course management, and hostel accommodations. By integrating multiple educational functions into a single platform, the system enhances efficiency, reduces paperwork, and improves communication between administrators, staff, and students.

For **school management**, the system facilitates student enrollment, subject allocation, exam scheduling, and report card generation. It also allows teachers to manage attendance, upload study materials, and communicate with students effectively. The **college management module** provides faculty with tools to manage course schedules, assign subjects, track student performance, and handle administrative tasks like fee payments and academic reports. Additionally, students can view their timetables, download study materials, and check their grades through an interactive portal.

The **hostel management module** simplifies the allocation of rooms, mess facilities, and student registrations. It helps administrators keep track of available accommodations, handle fee payments, and manage student check-ins and check-outs. With a centralized database, the system ensures that hostel records are updated in real-time, reducing errors and conflicts. It also enhances security by maintaining digital records of all residents.

The system is built with **secure authentication and role-based access**, ensuring that administrators, staff, and students can only access relevant information. Real-time notifications and messaging features help streamline communication within the institution, keeping all stakeholders informed about important updates. The user-friendly interface ensures ease of navigation, making it accessible to both tech-savvy and non-technical users.

By incorporating **modern web technologies**, this project provides a **scalable, efficient, and paperless** solution for campus management. It reduces manual workload, minimizes human errors, and improves the overall administration of educational institutions. With its modular structure, the system can be customized and expanded to meet the specific needs of different institutions, making it a valuable tool for the digital transformation of education.

CHAPTER: 1

Introduction

1.1 Project Profile

1.2 Project Introduction

1.1 PROJECT PROFILE

Project Title	Campus Management System
Project Type	Web - based
Front end	HTML , CSS , JS
Back End	My SQL
Project Duration	2 Months
Team Member	1
Guided By	Miss. Punam Patel
Submitted to	Vishwabharti Girls Institute of Management & Computer Application. , Morthana
Submitted By	Vaghasiya Sneha k. (Seat No :- 6880)

1.2 PROJECT INTRODUCTION

The **Campus Management System** is an all-in-one web-based solution designed to manage and automate the complete functioning of a **girls-only campus** that includes **School, College, and Hostel** facilities. This project aims to provide a secure, organized, and efficient platform that reduces manual work and simplifies the handling of daily campus activities. By using this system, management can maintain smooth operations across different departments while ensuring the privacy and safety of students and staff.

This project is specially designed for campuses dedicated to **girls' education**, focusing on providing a safe, organized, and well-maintained environment. Managing multiple departments within the same campus is often challenging. By introducing this system, the entire campus workflow, from academics to hostel life, is brought together on a single platform, making it easier for the administration to handle all processes without confusion or delay.

This system is designed with **8 dedicated panels** to manage different areas of the campus efficiently. The **Client Panel** is for students and parents to access important information such as timetables, study materials, results, hostel details, and announcements. The **Admin Panel** oversees the entire campus, controlling users, monitoring activities, and managing overall settings. For specific management, there are separate panels like the **School Admin Panel, School Staff Panel, College Admin Panel, College Staff Panel, Hostel Admin Panel, and Hostel Staff Panel**. Each panel has unique permissions and responsibilities based on their roles.

There are Eight type of Users:

1. Client panel
2. Admin Panel
3. School Admin Panel
4. School Staff Panel
5. College Admin Panel
6. College Staff Panel
7. Hostel Admin Panel
8. Hostel Staff Panel

CHAPTER: 2

ENVIRONMENT DESCRIPTION

2.1 Hardware/Software Requirement

2.2 Tools & Environment Description

2.1 HARDWARE / SOFTWARE REQUIREMENT

➤ Hardware Requirement

Processor	8 th Gen intel CORE i5
RAM	8.00GB (7.11 GB usable)
Hard Disk	256 GB

➤ Software Requirement

Operating System	Windows 11
Browser	Google chrome
Front End	HTML , CSS ,JS
Backend	PHP , MY SQL

2.2 TOOLS & ENVIRONMENT DESCRIPTION

Overview Of PHP :-

- PHP stands for: Hypertext Pre-processor. The product was originally named personal Home Page Tolls.
- PHP is a server side scripting language, which can be embedded in HTML or used as standalone binary. It's also called as open source.
- PHP is a real programming language. In PHP you can define functions to your hearts connect just by typing a name and definition. As we talk about the scalability two different things in this context.
- One of the key reasons for PHP's success is its simplicity and ease of learning. PHP has a syntax that is familiar to developers who have worked with languages like C, Java, or JavaScript, making the learning curve relatively smooth.
- Despite its simplicity, PHP is extremely powerful and capable of handling complex web applications.
- Performance-wise, PHP is known for its fast execution and efficiency. It works well with various web servers such as Apache, Nginx, and IIS and runs on multiple operating systems, including Windows, Linux, and macOS.

- PHP remains a dominant language in web development due to its flexibility, ease of use, and ability to build powerful, dynamic web applications.
- Whether you are creating a simple contact form or a complex enterprise portal, PHP provides the tools, libraries, and frameworks needed to bring your project to life.
- With strong community support, continuous updates, and compatibility with modern technologies, PHP continues to be a reliable and robust choice for developers around the world.
- It is an ideal language for beginners starting their journey into web development and for experienced professionals building complex, scalable systems.

❖ **Features of PHP :-**

- **Open Source:** PHP is free to download and use, which makes it accessible for everyone.
- **Easy to Learn:** Its simple syntax and resemblance to C, Java, and Perl make it beginner-friendly.
- **Platform Independent:** PHP works on various operating systems like Windows, Linux, macOS, etc.
- **Server-Side Scripting:** PHP runs on the server and generates dynamic web pages.
- **Database Support:** PHP supports multiple databases such as MySQL, PostgreSQL, Oracle, and more.
- **Fast Performance:** PHP executes code quickly, even on websites with high traffic.

❖ **Advantages :-**

- **Cost-Effective Development:** PHP is open-source, it reduces development costs.
- **Cross-Platform Compatibility:** PHP applications run seamlessly across multiple operating systems and servers.
- **Easy Integration:** PHP easily integrates with HTML, JavaScript, CSS, and various databases.
- **Rapid Development:** Frameworks like Laravel, CodeIgniter, and Symfony speed up development with pre-built modules.
- **Strong Community:** The global PHP community provides continuous updates, libraries, plugins, and technical support.
- **Secure:** PHP includes multiple layers of security to protect against threats and vulnerabilities.
- **Scalable:** Suitable for small websites to large enterprise-level applications.
- **High Performance:** PHP scripts execute faster and use fewer server resources.

❖ Disadvantages of PHP :-

- **Security Concerns:** If not coded properly, PHP websites can be vulnerable to security threats.
- **Not Ideal for Large Applications Alone:** For very large and complex systems, PHP may require additional support from other technologies.
- **Inconsistent Function Naming:** PHP's function names and parameters can be inconsistent and confusing.
- **Weak Error Handling:** Compared to other languages, PHP's error handling is relatively basic unless using custom solutions.
- **Requires Good Programming Practices:** Without following best practices, PHP code can become messy and hard to maintain.
- **Outdated Codebase Risk:** Some older PHP projects may use deprecated functions if not regularly updated.

✚ Overview of MY SQL

- MySQL is one of the most popular and widely used **Relational Database Management Systems (RDBMS)**.
- It is an open-source database software that helps to store, manage, and retrieve data efficiently.
- MySQL uses **Structured Query Language (SQL)** to perform operations like inserting, updating, deleting, and selecting data.
- It is mainly used in web applications and supports large-scale systems, handling millions of records with high performance and reliability.

- MySQL is commonly used alongside server-side scripting languages like **PHP** to build dynamic websites and applications.
- It is also the preferred choice for content management systems (CMS), e-commerce platforms, school and college management systems, and enterprise applications.
- Big companies like Facebook, Twitter, YouTube, and Wikipedia use MySQL because of its speed, flexibility, and security
- . It supports multiple users accessing the database at the same time without compromising on performance.

❖ **Reasons of using MySQL**

- MYSQL is an extensible, open storage database engine, offering multiple variations such as Berkeley DB, InnoDB, Heap and My0.I0+SAM.
- MYSQL integrates seamlessly with a number of programming languages and other web – based technologies.
- MYSQL is an open source system under the GNU General Public License; Developers can use it at no cost as long as the associated projects are also open – source.
- In the way of performance, MYSQL is the clear leader, mainly due to the format of its default table, MyISAM.
- MySQL is characterized as a free, fast, reliable open source relational database.
- MySQL executes most queries much faster than most other database systems.
- Because of its modularity and its flexibility in configuration, MySQL can run in systems varying in size from embedded systems to large multiprocessor.
- MySQL is easy to install and administer. While other database system require special knowledge.

XAMPP Server

- XAMPP is one of the most popular and widely used **local server environments** for web development.
- It is a free, open-source, and cross-platform software package developed by **Apache Friends**. The name **XAMPP** stands for:

X – Cross-Platform (Windows, Linux, macOS)

A – Apache (Web Server)

M – MySQL / MariaDB (Database)

P – PHP (Scripting Language)

P – Perl (Programming Language)

- XAMPP helps developers to create, test, and deploy web applications on their local computer without the need for an internet connection or external web hosting.

- It packages all the necessary components like **Apache Server**, **MySQL Database**, **PHP**, and **phpMyAdmin** in a single installer, making it extremely easy to set up a complete web development environment in minutes.

❖ Advantages of XAMPP Server :-

- XAMPP is a free and open-source local server package that provides all essential tools like Apache, MySQL, PHP, and Perl in one easy installer.
- XAMPP offers a simple and beginner-friendly setup process, making it ideal for students and developers to quickly create a local development environment.
- It supports cross-platform compatibility, allowing developers to work seamlessly on Windows, Linux, and macOS systems.
- XAMPP allows offline web development and testing without the need for an internet connection or live hosting.
- It includes phpMyAdmin for easy and efficient management of MySQL databases through a web interface.
- XAMPP is perfect for learning and small-scale projects, as it provides all tools needed to practice web development.

❖ Disadvantages of XAMPP Server :-

- XAMPP is not secure for live or production servers, as it is mainly designed for local development purposes.
- It may cause performance issues and is not suitable for large-scale or high-traffic websites.
- Manual configuration of files like php.ini and httpd.conf can be complex for beginners.
- Running multiple services in XAMPP can consume a lot of system resources and slow down your computer.
- Updating components like PHP and MySQL manually can lead to compatibility issues with existing projects.
- Default weak passwords and settings can create security risks if not properly changed.
- XAMPP lacks automatic updates, so users must regularly check and update versions themselves.

Overview of HTML :-

- HTML (HyperText Markup Language) is the standard language used to create and design web pages.
- It provides the basic structure for websites by organizing and formatting content such as text, images, links, and multimedia elements.
- HTML is not a programming language but a markup language that uses tags to define the content structure.
- Web browsers interpret HTML to display web pages in a user-friendly way, presenting content like headings, paragraphs, images, forms, and other multimedia elements.

- HTML is fundamental for web development. It provides the building blocks for creating webpages and applications.
- HTML tags are used to define various elements like paragraphs, headings, links, and forms. It is also used to structure the content on a page, making it organized and readable. HTML supports multimedia elements, allowing images, videos, and audio files to be embedded into the webpage.
- It also allows linking to other pages, forming the backbone of web navigation.

❖ Advantages of HTML :-

- Easy to learn and use for beginners.
- Universal browser compatibility.
- Allows integration with CSS and JavaScript for enhanced functionality.
- Supports multimedia elements like images, audio, and video.

❖ Disadvantages :-

- Lacks advanced functionality without CSS and JavaScript.
- Does not provide built-in security features.
- Cannot create dynamic content or real-time actions by itself.
- Limited styling and design capabilities.
- Not suitable for complex web applications on its own.
- Requires external technologies for interactive web elements.

✚ Overview of CSS

- CSS (Cascading Style Sheets) is a styling language used to control the layout and appearance of web pages written in HTML.
- It allows web developers to separate content (HTML) from design (CSS), providing more flexibility in how a web page looks.
- CSS defines elements like colors, fonts, spacing, and positioning, making web pages visually appealing and user-friendly.
- It can also be used to make web pages responsive, adjusting their layout according to the device or screen size.

❖ Advantages of CSS :-

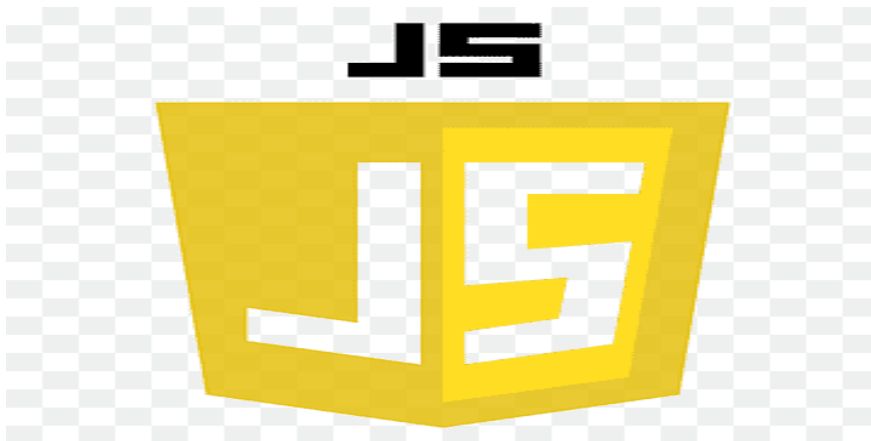

- Separates content from design for easier maintenance.
- Improves page load times by reducing HTML code.
- Ensures consistent styling across multiple pages.
- Allows detailed customization of layouts, fonts, and colors.
- Enables responsive design for various screen sizes.
- Supports animations and transitions for dynamic effects.

❖ Disadvantages of css :-

- Can become complex to manage for large websites.
- Cross-browser compatibility issues may arise.
- Limited to visual styling and cannot handle interactivity.
- Lacks conditional logic or calculations like JavaScript.
- Advanced techniques may have a learning curve for beginners.

🌈 Overview of javascript :-

- JavaScript is a high-level, dynamic programming language that is primarily used to create interactive and dynamic content on websites.

- It is one of the three core technologies of web development, alongside HTML and CSS.
- JavaScript allows developers to implement complex features such as user interactivity, form validation, animations, real-time content updates, and more.
- It is primarily used for client-side scripting, but with the advent of Node.js, it is now also used for server-side development.
- JavaScript is one of the core technologies of the World Wide Web.
- JavaScript enables interactive web pages and is an essential part of web applications.
- The vast majority of websites use it, and major web browsers have a dedicated JavaScript engine to execute it.

❖ **Advantages of Javascript :-**

- Enhances user experience with interactive and dynamic content.
- Works across different browsers and platforms.
- Speeds up web pages by running on the client's browser.
- Enables real-time interactivity through event-driven programming.
- Extensive ecosystem with libraries and frameworks for faster development.

❖ **Disadvantages of JavaScript :-**

- Can have compatibility issues across different browsers.
- Exposes security risks since it runs on the client-side.
- May cause performance issues on resource-intensive applications.
- Requires JavaScript to be enabled in the browser, limiting functionality if disabled.
- Advanced concepts like asynchronous programming can be challenging to learn.

System Analysis And Planing

3.1 Limitation of Current system

3.2 Feasibility study

3.3 Software Requirement specification

3.4 Time Line Chart

3.1 LIMITATION OF CURRENT SYSTEM

- Lack of real-time data updates.
- Limited cross-platform support, especially on mobile devices.
- Scalability issues with increasing users or data.
- Security vulnerabilities and risks of data breaches.
- Dependence on manual processes, causing inefficiencies.

3.2 FEASIBILITY STUDY

- A Feasibility Study is a critical component of any project as it helps determine whether the proposed project is viable in terms of technical, operational, financial, and legal aspects.
- For the Campus Management System (CMS), this study will assess whether the system can be successfully implemented with respect to the available resources, cost constraints, required technical expertise, and legal considerations.
- By thoroughly analyzing these factors, we ensure that the system is not only achievable but will also provide value to the institution while meeting all necessary requirements.
- A feasibility study is an analysis that evaluates the practicality and potential success of a proposed project or system.
- It examines various factors to determine whether a project is technically, financially, and operationally viable.
- A comprehensive feasibility study helps stakeholders make informed decisions before committing resources to the project.

1. Technical Feasibility :-

- The technical feasibility of the CMS evaluates whether the technology required for the project is available, reliable, and capable of supporting the system.
- The CMS will be developed using web technologies such as PHP, HTML, CSS, JavaScript, and MySQL for database management. These technologies are well-established, widely used, and compatible with various operating systems and devices.

- The system will require a server to host the CMS application, which can be done using cloud-based servers or dedicated servers. The system will be deployed using XAMPP, WAMP, or other similar web server setups for local testing and can be migrated to a production server with minimal changes.
- The CMS needs to be compatible with existing systems within the institution, such as the school/college's website and online payment gateways. This ensures smooth data flow between systems.

2. Economic Feasibility :-

- Economic Feasibility analyzes whether the Campus Management System (CMS) can be completed within the budget constraints of the institution and whether it offers a good return on investment (ROI).
- The focus is on ensuring the project's costs do not exceed available financial resources while providing value to the institution.
- The CMS development will incur costs in areas such as software development, hardware, licensing (if applicable), server hosting, and staff training.
- However, open-source technologies like PHP, MySQL, and JavaScript help minimize software development costs.
- The project should also consider long-term operational costs such as ongoing maintenance, hosting fees, and upgrades.
- The institution should allocate funds for initial development and subsequent operational costs. Typically, costs will be split between development, testing, deployment, and staff training.

3. Operational Feasibility :-

- Operational feasibility assesses whether the CMS can be successfully implemented and operated in the long term.
- The system will be user-friendly, but staff and students will still require training on how to use it effectively.
- This can be achieved through detailed documentation, training sessions, and helpdesk support.

3.3 SOFTWARE REQUIREMENT SPECIFICATION

1. PLATFORM USED :-

- Visual studio is operating system in making and running this software.

2. FRONT END USED :-

- To make this software HTML , CSS AND JS as a front end tool to design for layout.

3. BACK END USED :-

- PHP , MY SQL used as a backend tool for maintaining the database of all the.

SYSTEM

4.1 Scope of system

4.2 Project modules

4.3 Objectives

4.4 Expected advantages

4.1 SCOPE OF SYSTEM

- A Campus Management System website is designed to provide an integrated platform for managing various aspects of educational institutions such as schools, colleges, and hostels.
- It offers an online interface for students, faculty, administrative staff, and hostel management to interact with and manage all necessary information related to academics, fees, hostel accommodations, and communication.
- This website serves as a centralized hub where all data regarding students, faculty, courses, hostel accommodations, fees, and events are stored and accessed.
- It combines the features of school, college, and hostel management into one platform, offering a streamlined approach for managing student records across various stages of education.
- The website provides an intuitive interface for users, whether they are students, parents, staff, or administrators.
- Students can log in to view their grades, timetable, exam schedules, and fees, while staff members can manage courses, student records, and other administrative tasks.
- Administrators have access to all systems for overseeing the operations of the institution, from course registrations to hostel accommodation.
- For students staying in hostels, the website provides a dedicated portal for managing accommodation details, room allocations, and meal plans. It also helps track hostel rules and regulations, visitor access control, and any violations.
- Hostel staff can update meal timetables, track room assignments, and manage day-to-day hostel activities through the CMS platform.
- Administrators can send important updates, reminders, and announcements, ensuring that everyone stays on the same page.
- This communication extends to hostel staff and students, allowing easy reporting of issues or concerns regarding accommodations.
- Overall, the Campus Management System simplifies campus operations, fosters better communication, and improves efficiency for all stakeholders involved..

4.2 PROJECT MODULES

Client module :-

1. View Timetable:-

- School Timetable (Class-wise)
- College Timetable (Course-wise/Semester-wise)

2. View Courses / Subjects:-

- School Subjects (Class-wise)
- College Courses (BCA, BBA, BCom, MSc IT, etc.)

3. View Exam Schedule:-

- School Exams (Unit Tests, Term Exams, Finals)
- College Exams (Internal, External, Semester Exams)

4. View Staff Introductions:-

- School Staff (Teachers, Subjects, Qualifications)
- College Staff (Professors, Lecturers, Specializations)
- Hostel Warden Ma'am (Name, Contact, Duties)
- Hostel Support Staff (Cleaning, Security, Maintenance)

5. View Fees Structure

- School Fees (Class-wise)
- College Fees (Course-wise)
- Hostel Fees
- Transport Fees

6. Download Study Materials

- School Notes, Homework, Assignments
- College Notes, Projects, Presentations

7. Hostel Features

- View Rules & Regulations (Safety, Discipline)
- View Mess Timetable (Meal Schedule)
- View Room Details (Allotment, Roommates)

- Attendance & Outing Records (Entry/Exit Logs)
- Submit Complaints & Maintenance Requests
- View Hostel Notices (Events, Holidays, Updates)

8. Transportation Features:-

- View Bus Routes and Stop Locations
- View Bus Timetable (Pickup & Drop Timings)
- Receive Transport Notifications (Delays, Changes).

Admin panel :-

1. Messages:

- The messaging system allows administrators to send announcements, updates, and notifications to teachers, students, or hostel staff.
- It facilitates easy communication for all important messages related to exams, schedules, fees, and other campus activities.

2. Facility Management:

- Admins can manage all campus facilities such as classrooms, hostel accommodations, transportation, and more.
- The facility section allows for easy booking, allocation, and management of these resources, ensuring efficient use and availability.

3. Notice Board:

- The notice board section enables administrators to post important announcements and notices for all students and staff to view.
- This can include exam schedules, holidays, events, fee reminders, and other essential information that needs to be communicated to the campus community.

4. Teacher Reports:

- The admin can view and generate detailed reports for teachers, including their attendance, performance, assigned courses, and overall contributions.
- This helps in evaluating the effectiveness of faculty members and managing their workloads.

5. Student Reports:

- Admins can access comprehensive student reports that include academic progress, attendance, exam results, and fee payment history.
- This feature allows for better tracking of student performance and helps in making informed decisions regarding academic and administrative actions.

6. Enquiry Management:

- This section helps the admin manage inquiries received from prospective students, parents, or other stakeholders.
- It tracks incoming queries, responses, and follow-ups, ensuring that all inquiries are addressed in a timely manner.

7. Contact Us Page:

- The "Contact Us" page provides a direct way for students, parents, and staff to get in touch with the administration.
- It includes contact forms, phone numbers, email addresses, and office locations, making it easy for individuals to reach out for any queries or support.

School admin panel :-

1. Students

- Manage student information (add, edit, view)
- View personal details, academic records, and attendance
- Search and filter options.

2. Staff

- Manage staff details (add, edit, view)
- Assign teaching or administrative roles.

3. Time Table

- Create and update timetables for classes and subject.
- View daily, weekly, and monthly schedules
- Ensure no timetable conflicts

4. Courses

- Add, edit, and remove courses
- Assign teachers to courses
- View course details (duration, subject, instructor)

5. Gallery

- Upload and manage images/videos of school activities
- Categorize media by events
- Display media to students and parents

6. Exams Page

- Create and update exam schedules
- Upload exam question papers
- View and manage exam results

7. Pay Fees Page

- Set up fee structure
- Track fee payments (paid, pending)
- Generate fee receipts

8. Admission Page

- Process admission applications
- Track and approve/reject applications
- Enroll students into respective classes

9. Achievements Page

- Display awards, recognitions, and milestones
- Track academic, sports, and cultural achievements
- Celebrate student and staff success.

School Admin panel :-

1.Students Page

- Manage student information (add, edit, view).
- Search and filter student records.
- Assign students to classes.

2. Time Table Page

- Create and update class timetables.
- View schedules for all classes.
- Avoid timetable conflicts.

3. Study Material Page

- Upload and manage study resources.
- Categorize materials by subject or class.
- Provide student access to materials.

4. Exam Schedule Page

- Create and manage exam schedules.
- View and update upcoming exams.
- Track and manage exam results.

College admin panel :-

1. Students Page

- Manage student information (add, edit, view).
- Track student enrollment, academic records, and progress.
- Assign students to courses and sections.

2. Faculty Page

- Manage faculty details (add, edit, view).
- Assign courses and teaching responsibilities.
- Track faculty attendance and performance.

3. Attendance Report

- Monitor and generate attendance reports for students and faculty.
- Track attendance patterns and generate alerts for absenteeism.

4. Scholarships Page

- Manage scholarship programs and applications.
- Review student eligibility and award scholarships.

5. Placements Page

- Manage placement activities and companies visiting the college.
- Track student placement progress and success rates.

6. Fees Page

- Manage fee structure and payments.
- Track pending, paid fees, and generate fee receipts.

7. Rules Page

- Display and update college rules and regulations.
- Ensure students and faculty comply with college policies.

8. Courses Page

- Manage courses offered by the college.
- Assign faculty members to each course and update course details.

9. Time Table Page

- Create and manage timetables for all courses and exams.
- Ensure no timetable conflicts for students and faculty.

10. Exam Page

- Create and manage exam schedules and room allocations.
- Track exam results and generate report cards.

11. Admission Page

- Manage and track student admission applications.
- Approve or reject applications and enroll students.

12. Contact Us Page

- Manage contact inquiries and feedback from students, parents, and faculty.
- Display important contact information for the college.

13. Gallery Page

- Upload and manage photos and videos of college events, activities, and achievements.
- Categorize media based on events and display on the website.

 College staff panel :-

1. Students Page

- View and manage student details and academic progress.
- Access student enrollment and academic records.

2. Attendance Page

- Mark and track student attendance for classes.
- Generate attendance reports for specific periods and classes.

3. Exam Page

- View exam schedules and manage exam-related activities.
- Enter marks and track student performance in exams.

4. Study Materials Page

- Upload and manage study materials such as notes and assignments.
- Provide access to materials for students as per the course and class.

5. Time Table Page

- View and manage class timetables.
- Ensure no timetable conflicts and keep the staff updated on schedule changes.

 Hostel Admin panel :-

1.Room Page

- Manage room assignments and availability.
- Track occupancy, room types, and facilities provided.

2. Rules Page

- Manage hostel rules and regulations.
- Update and display rules for student compliance.

3. Mess & Food Page

- Manage mess menu and food services.
- Track meal timings, special diet requirements, and food-related issues.

4. Admission Page

- Manage hostel admissions for students.
- Track student arrival, allocation to rooms, and other admission-related details.

5. Students Page

- View and manage student details residing in the hostel.
- Track attendance, behavior, and complaints if any.

6. Fees Page

- Manage hostel fee structure and payments.
- Track fee payments and generate receipts.

7. Warden Page

- Manage warden details, responsibilities, and performance.
- Track warden duties, schedules, and reports.

8. Support Staff Page

- Manage support staff such as cleaners and security personnel.
- Assign tasks and track their performance.

9. Visitor Page

- Manage and track visitors to the hostel.
- Maintain records of visitor entries and exits.

Hostel staff panel :-

1. Support Staff Page

- Manage and assign tasks to support staff (cleaners, security, etc.).
- Track staff duties, shifts, and performance.

2. Visitor Page

- Manage visitor entries and exits.
- Track visitor details and ensure visitor compliance with hostel rules.

3. Students Page

- View and manage student details residing in the hostel.
- Track student attendance and behavior.

4. Room Allocation Page

- Assign rooms to students and track room occupancy.
- Update room availability and handle student room requests.

5. Attendance Page

- Mark and track student attendance in the hostel.
- Generate attendance reports for students.

6. Application for Leave Page

- Process and manage student leave applications.
- Track approved or rejected leaves for hostel students.

7. Complaint Page

- Handle student complaints related to hostel services (rooms, food, etc.).
- Track complaint resolution status and manage feedback.

4.3 OBJECTIVES

The Objective of the Campus Management System (covering school, college, and hostel management) is to streamline and automate various administrative and operational processes within educational institutions and hostel facilities. Below are the primary objectives of this system:

1. **Efficient Management:** To provide a centralized platform for managing students, staff, courses, rooms, admissions, attendance, exams, and other vital academic and hostel-related activities, improving operational efficiency.
2. **Real-time Access:** To offer real-time access to key data for administrators, faculty, staff, and students, ensuring accurate information at the right time for decision-making.
3. **Automation of Processes:** To automate routine tasks like fee payments, attendance marking, exam schedules, and room allocations, reducing manual work and errors.
4. **Improved Communication:** To facilitate effective communication between students, staff, administrators, and hostel management through notifications, messages, and updates on academic and hostel-related activities.
5. **Data Management & Security:** To ensure that all academic, financial, and personal data is securely stored and easily retrievable, meeting regulatory requirements and minimizing data loss risks.
6. **Enhanced Student Experience:** To offer students a seamless experience in accessing study materials, exam schedules, fee structures, and hostel services, improving their overall satisfaction.
7. **Resource Optimization:** To optimize the use of institutional resources like classrooms, faculty, rooms, and hostel facilities, ensuring maximum utilization and cost-effectiveness.
8. **Comprehensive Reporting:** To generate detailed and accurate reports on student performance, staff activity, financial transactions, and hostel management, aiding in efficient decision-making.
9. **Regulation Compliance:** To ensure that all aspects of the school, college, and hostel are compliant with relevant educational and regulatory standards, including data protection and financial transactions.
10. **Scalability and Flexibility:** To build a scalable and flexible system capable of adapting to the changing needs of educational institutions and hostel facilities, supporting future growth and expansion.

4.4 EXPECTED ADVANTAGES

The **expected advantages** of the **Campus Management System** (covering school, college, and hostel management) are as follows:

1. **Increased Efficiency:** Automation of administrative tasks such as student registration, attendance, fee management, room allocation, and exam scheduling significantly reduces manual work, making processes faster and more efficient.
2. **Centralized Data Management:** All information (students, staff, exams, fees, and hostel details) is stored in a centralized database, ensuring easy access and better management of records, reducing data redundancy and the risk of errors.
3. **Improved Communication:** The system facilitates seamless communication between students, staff, parents, and administrators through notifications, emails, and messages, ensuring that all parties are kept informed of important events and updates.
4. **Real-Time Access:** Administrators, staff, and students can access real-time data, making it easier to make informed decisions, track progress, and respond to issues promptly.
5. **Better Decision-Making:** The system generates detailed reports and analytics on student performance, attendance, financials, and hostel management, helping administrators and faculty make data-driven decisions.
6. **Reduced Paperwork:** With digital record-keeping and reporting, the need for paper-based documentation is minimized, leading to reduced administrative costs and a more eco-friendly operation.
7. **Enhanced Security:** Sensitive data such as personal information, academic records, and financial transactions are securely stored with encryption and access controls, ensuring privacy and security.
8. **User-Friendly Interface:** The system is designed to be user-friendly, making it easy for administrators, staff, and students to navigate and perform tasks without extensive training or technical knowledge.
9. **Time-Saving:** Tasks like fee payment processing, report generation, and exam scheduling are automated, saving valuable time for staff and students.
10. **Scalability:** The system is scalable, allowing for easy expansion to include additional features or to accommodate growing student and staff numbers as the institution expands.
11. **Improved Student Experience:** Students can access their academic records, exam schedules, study materials, hostel services, and other essential information in one place, improving convenience and satisfaction.
12. **Cost-Effective:** By reducing administrative overhead, eliminating paperwork, and streamlining operations, the system can lead to long-term cost savings for the institution.

Detail Planning

5.1 Data – Flow Diagram / UML

5.2 Data – Flow Diagram

5.3 Use case Diagram

5.4 Activity Diagram

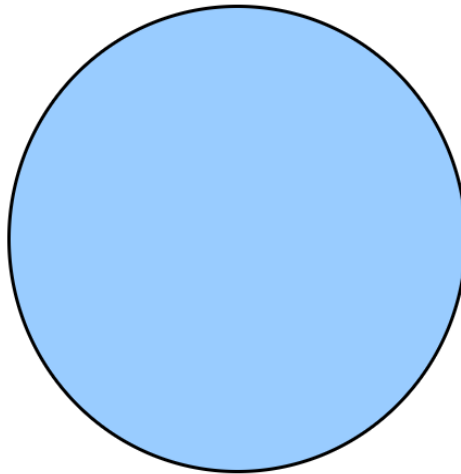

5.5 Table Structure

5.1 DATA FLOW DIAGRAM / UML

A Data Flow Diagram represents the flow of data within the system, showing how inputs are processed and outputted at various levels.

Symbols used in DFD

1. Process :-

- Flow of data is transformed.
- A process represents some amount of work a single behaviour of data.
- Transformations of data from one from to another.
- A circle represents a process.
- The area of circle is divided into two parts.
- The process number is written in the top portions and process name is written the bottom portion.
- E.g. verify credits, update inventory file , etc.

2. External Entity :-

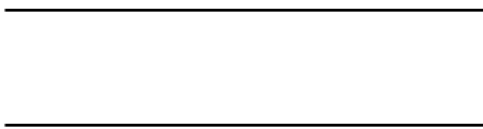

- A source or destination of data which is external to the system.
- As the name suggest it line outside the context of system , it represents by solid squares.
- The people / department that will be giving the data and / or receiving information.

3. Data Flow :-

- Line is packet od data. It may be of from of documentation, letter etc.
- A data flow portrays an interface among different components in the flow diagram.
- The arrow head point in the directions in which the data moves.

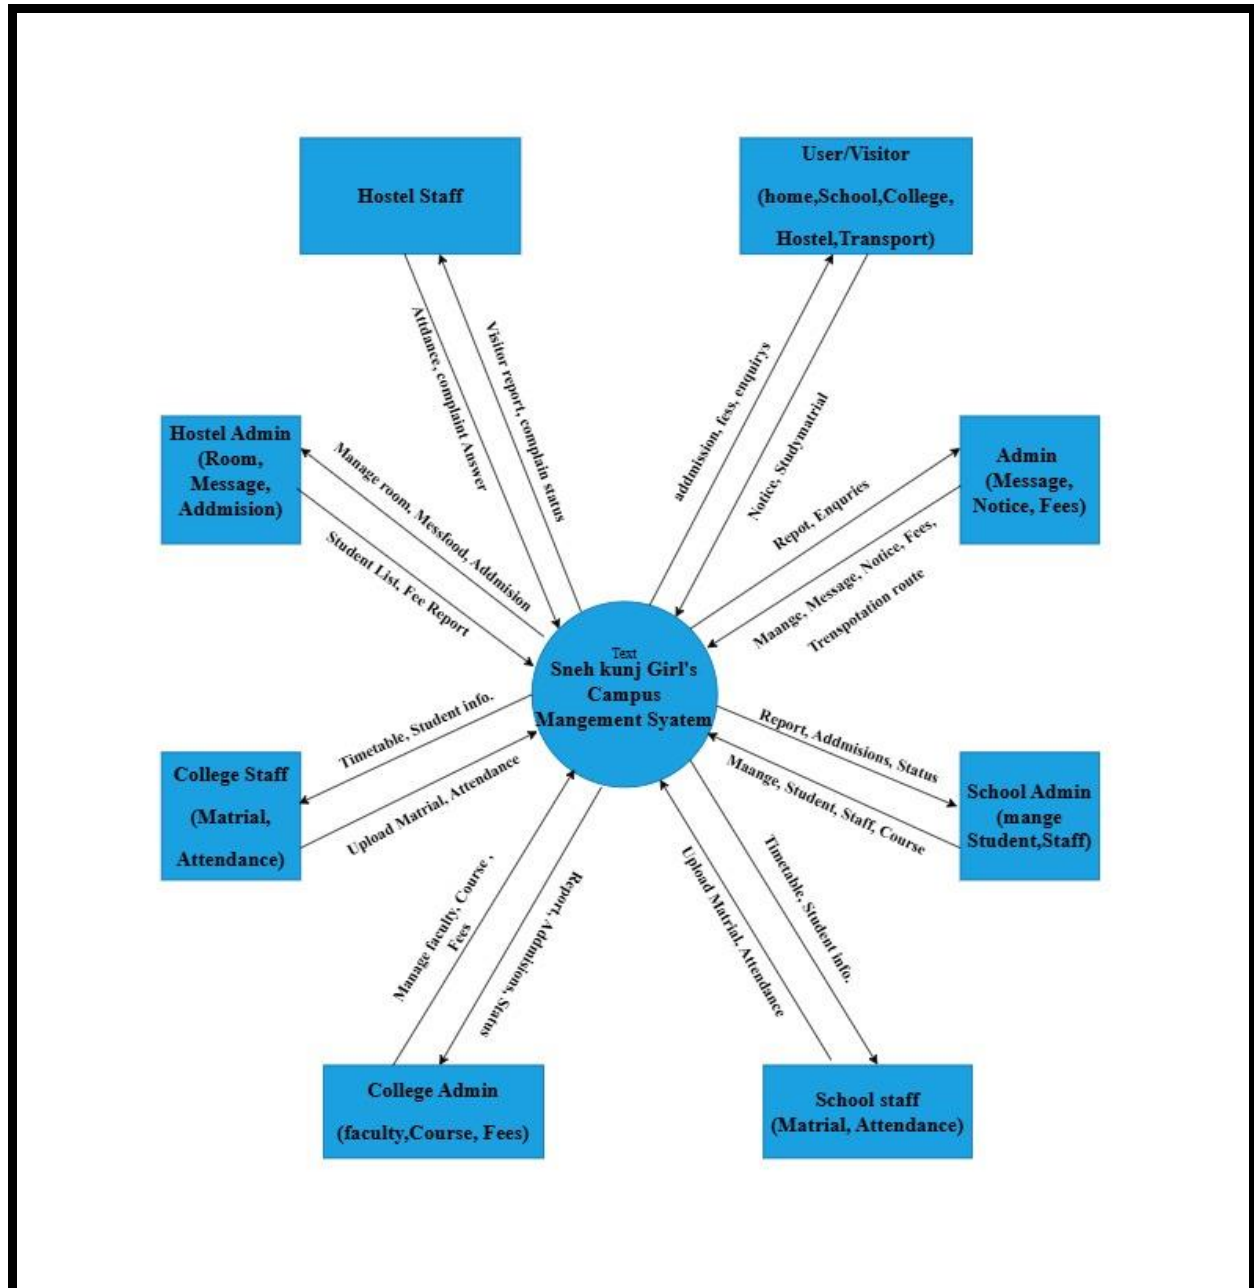

4. Data store :-

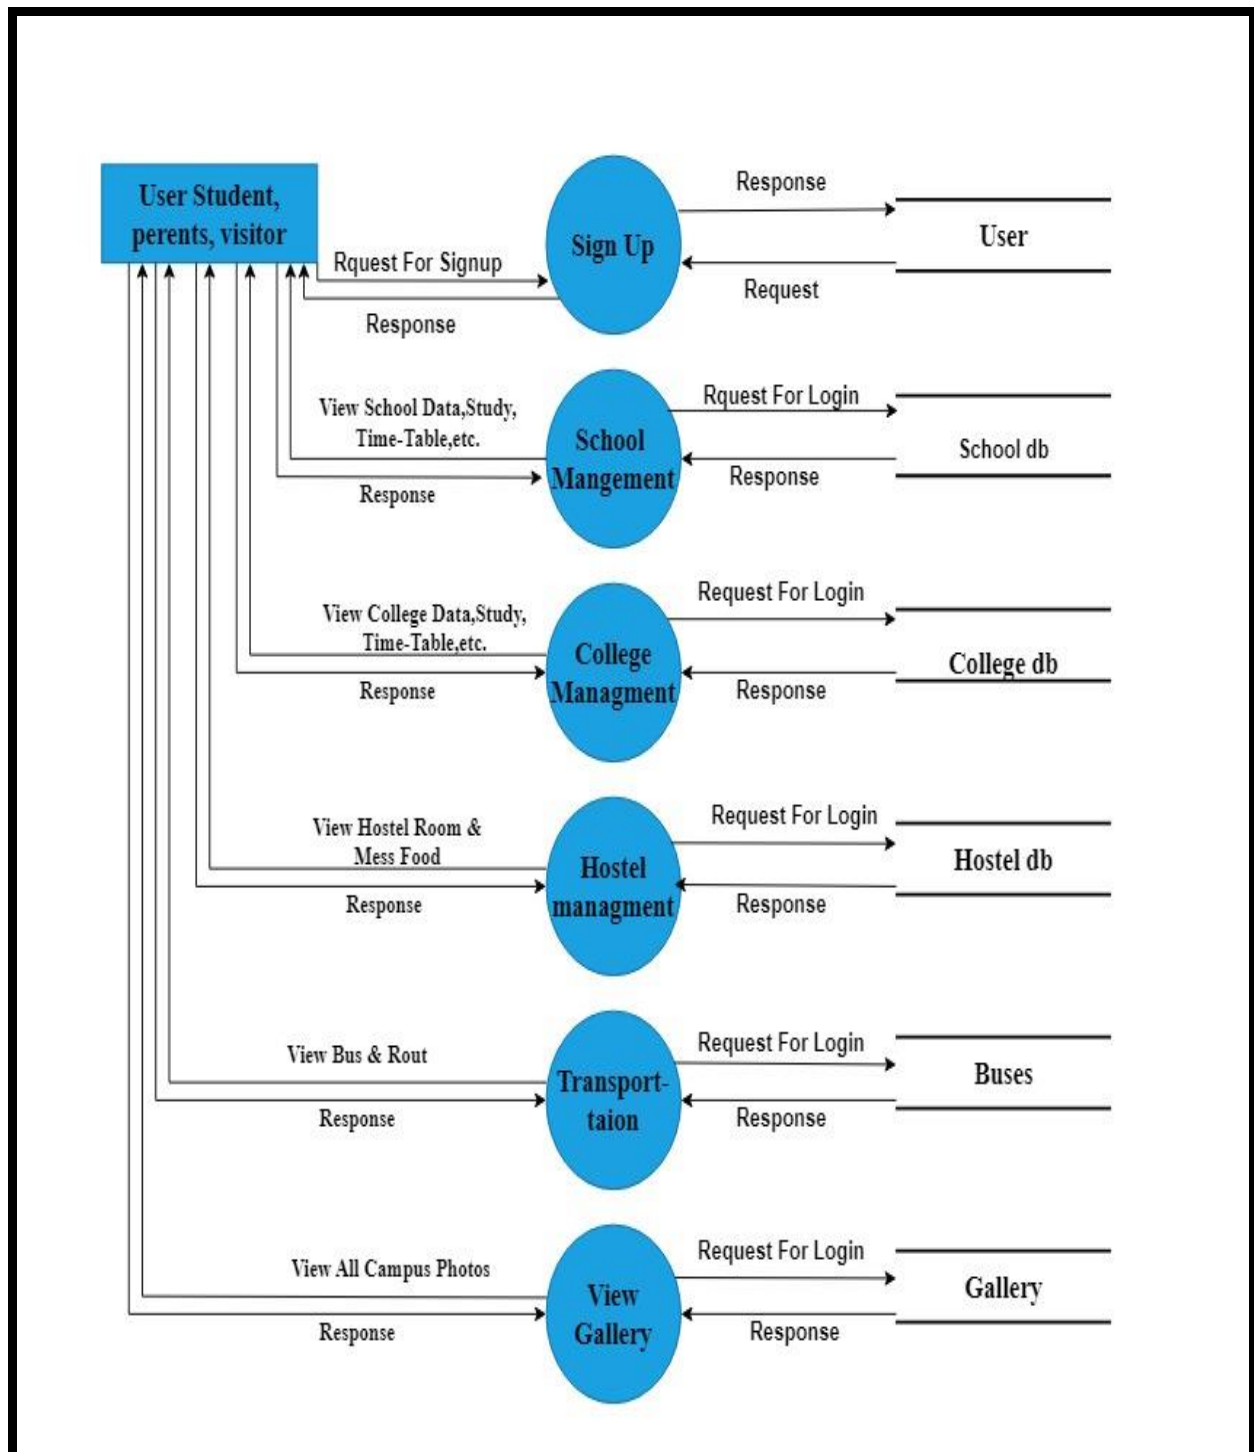

- Any stores data but no references to the physical method od storing.
- If there is a logical requirement for the data to be stored, it is held in a data store
- A data store there for , is repository of data.

5.2 DATA FLOW DIAGRAM

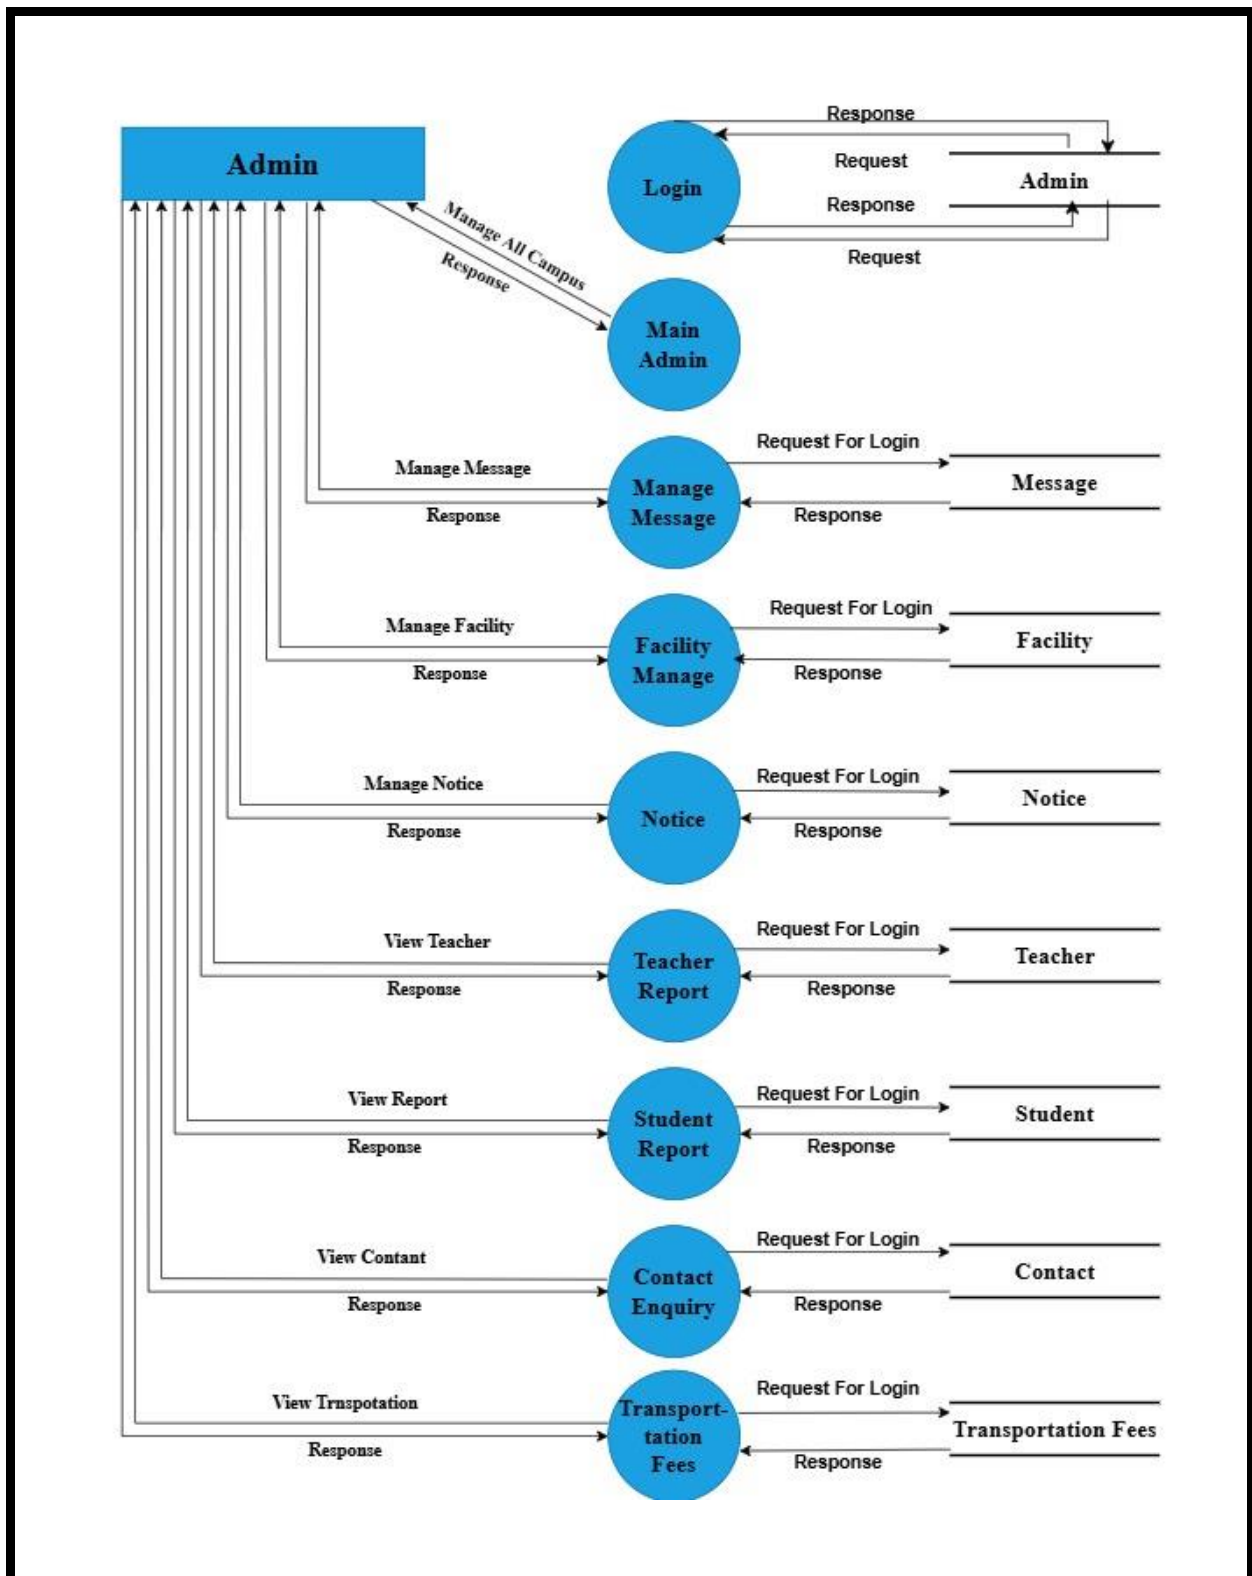

1. Zero level DFD (context level)

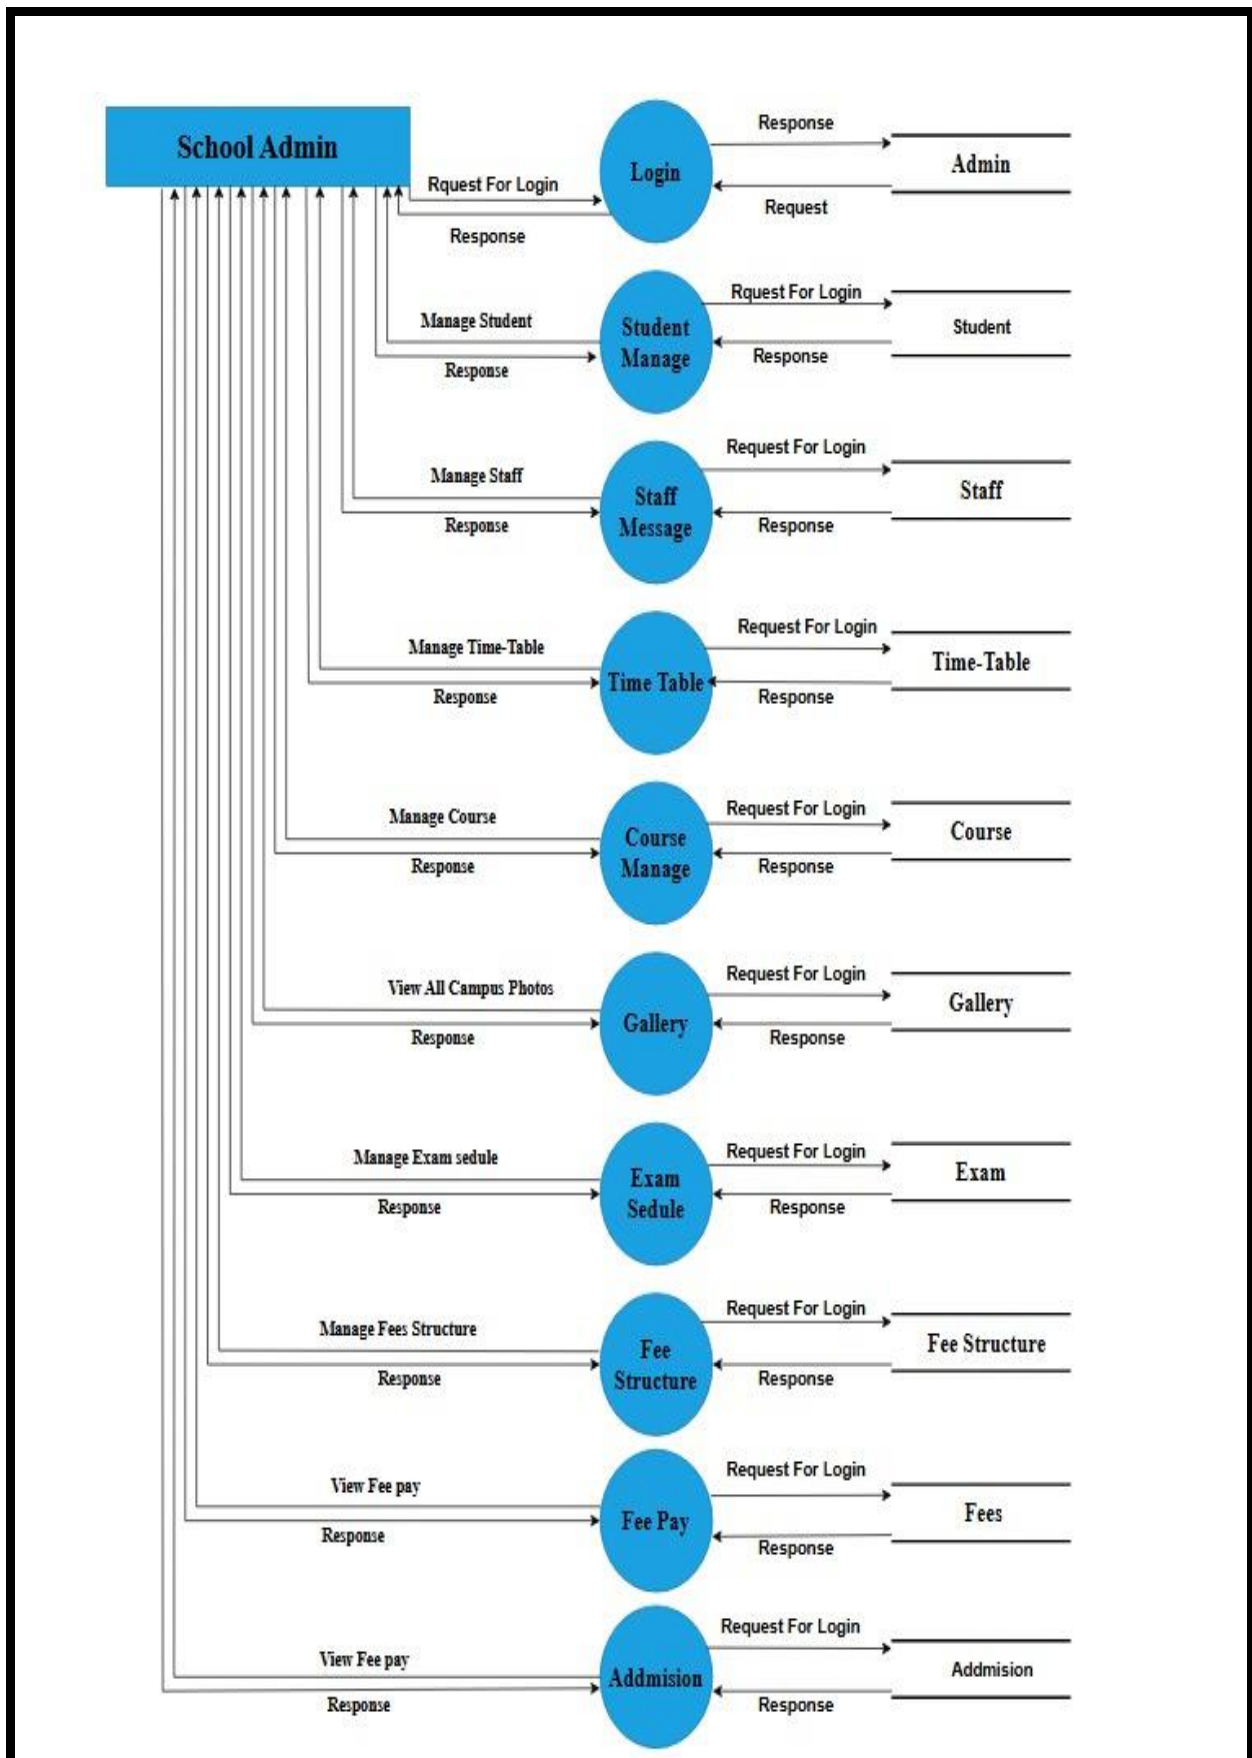

2. 1st level DFD (client)

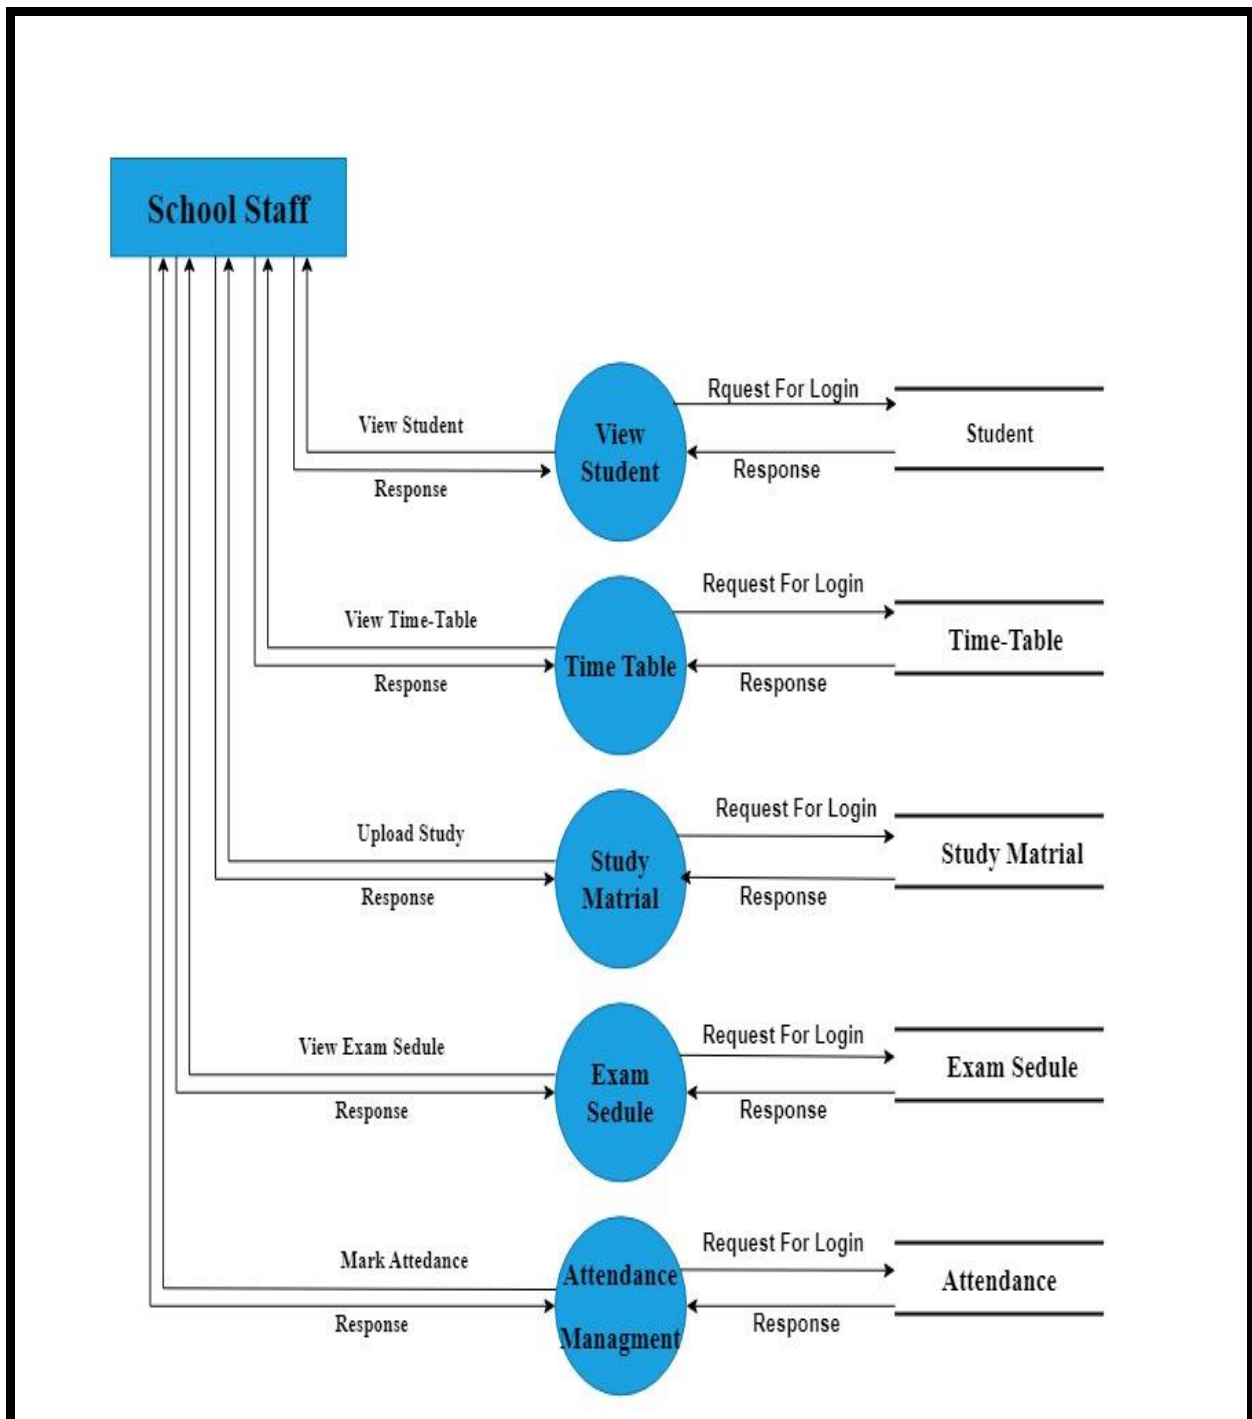

3. 1st level DFD (super admin)

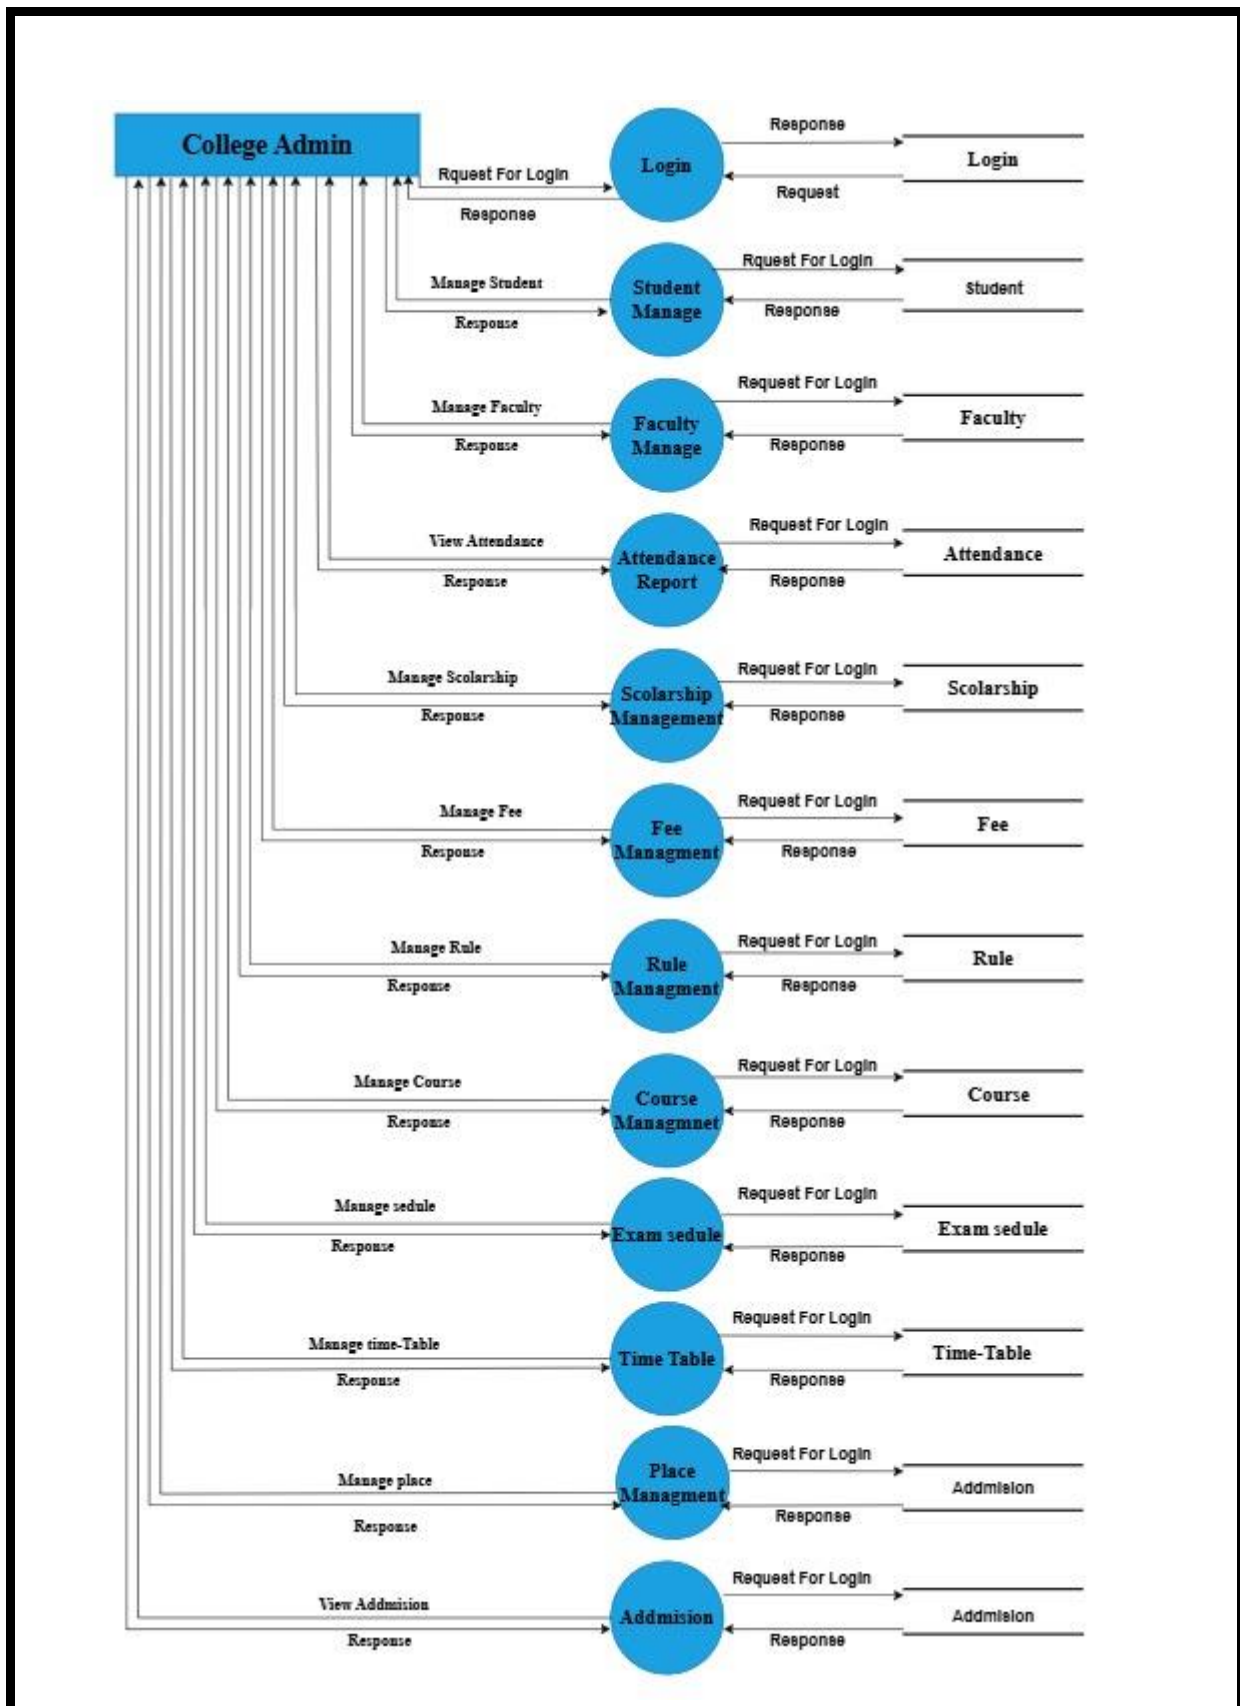

4. 1st level DFD (school admin)

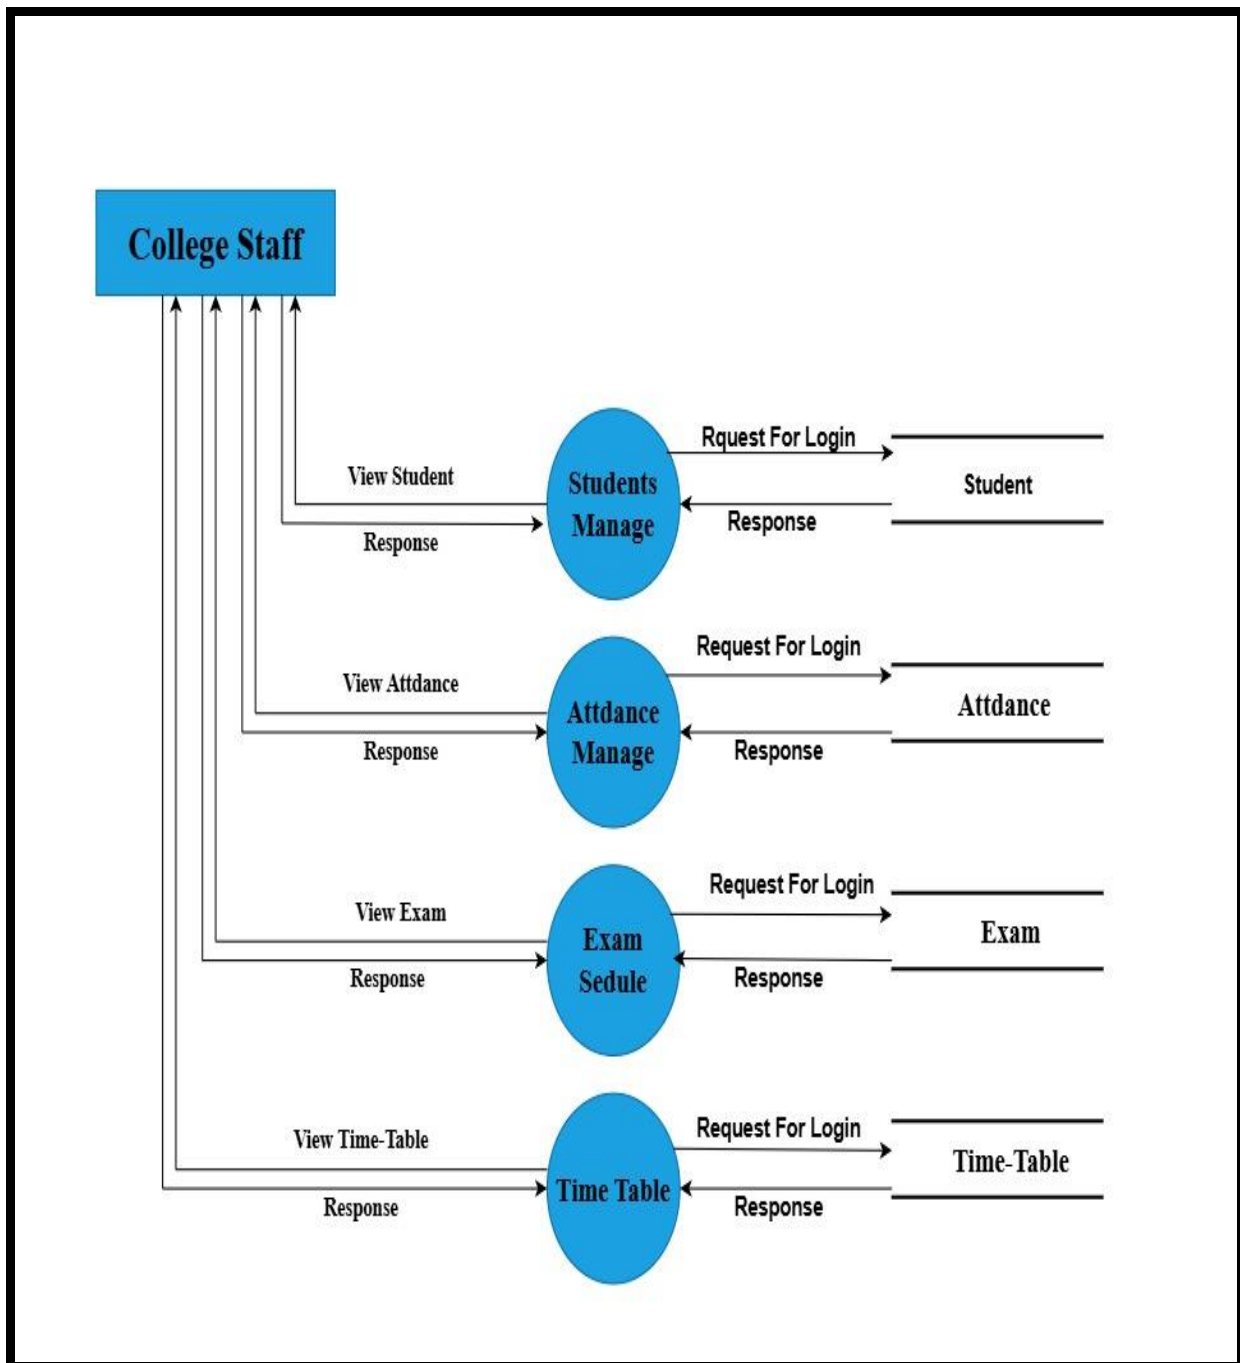

5. 1st level DFD (school staff panel) :-

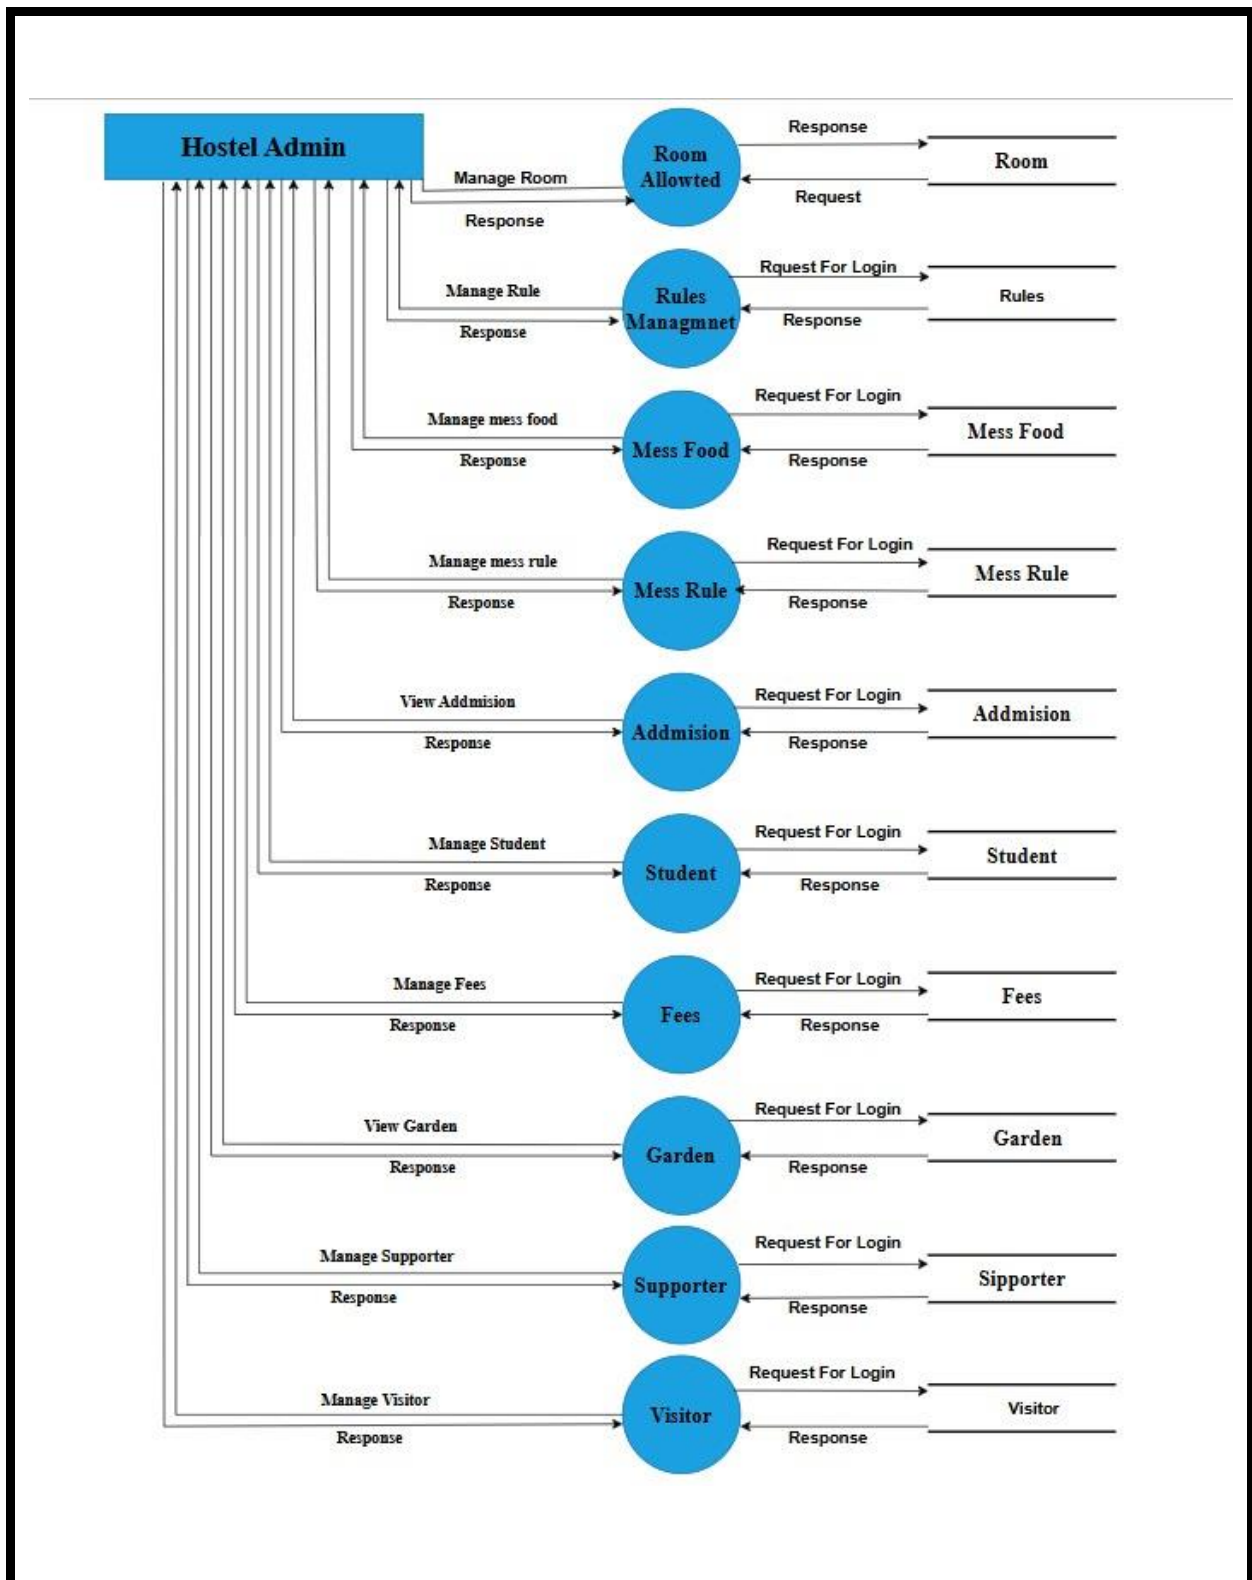

6. 1st level DFD (college admin panel)

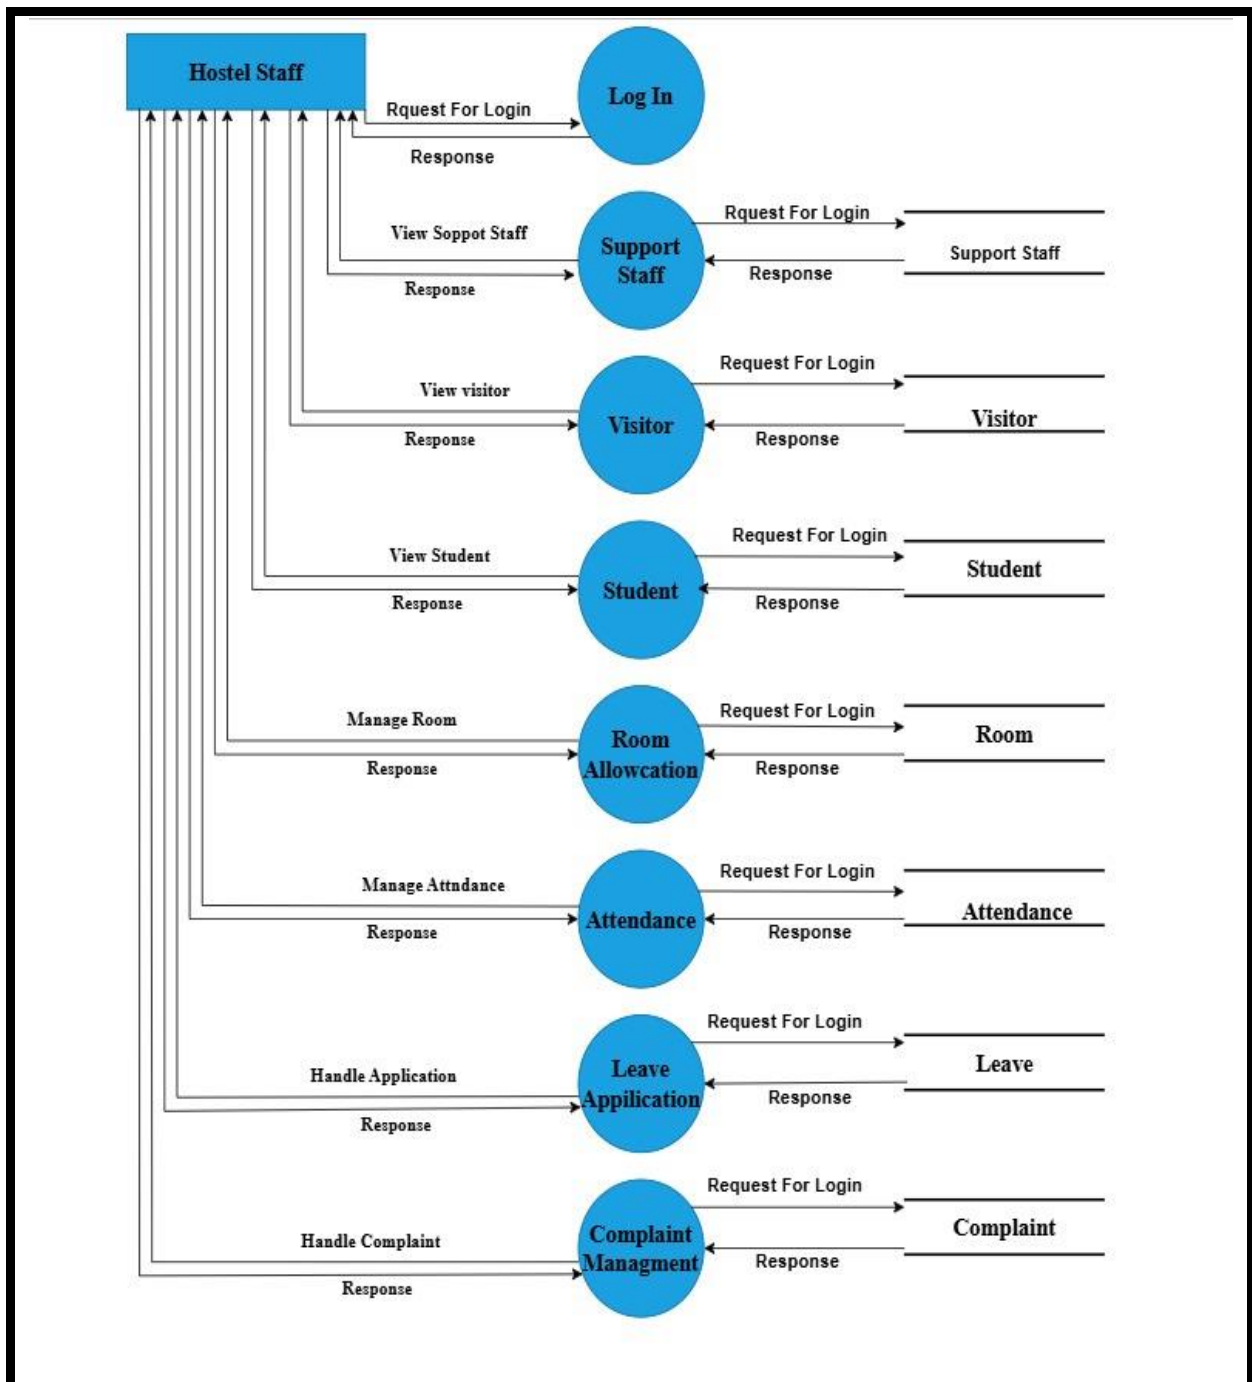

7. 1st level DFD (college staff panel)

8. 1st level DFD (hostel admin)

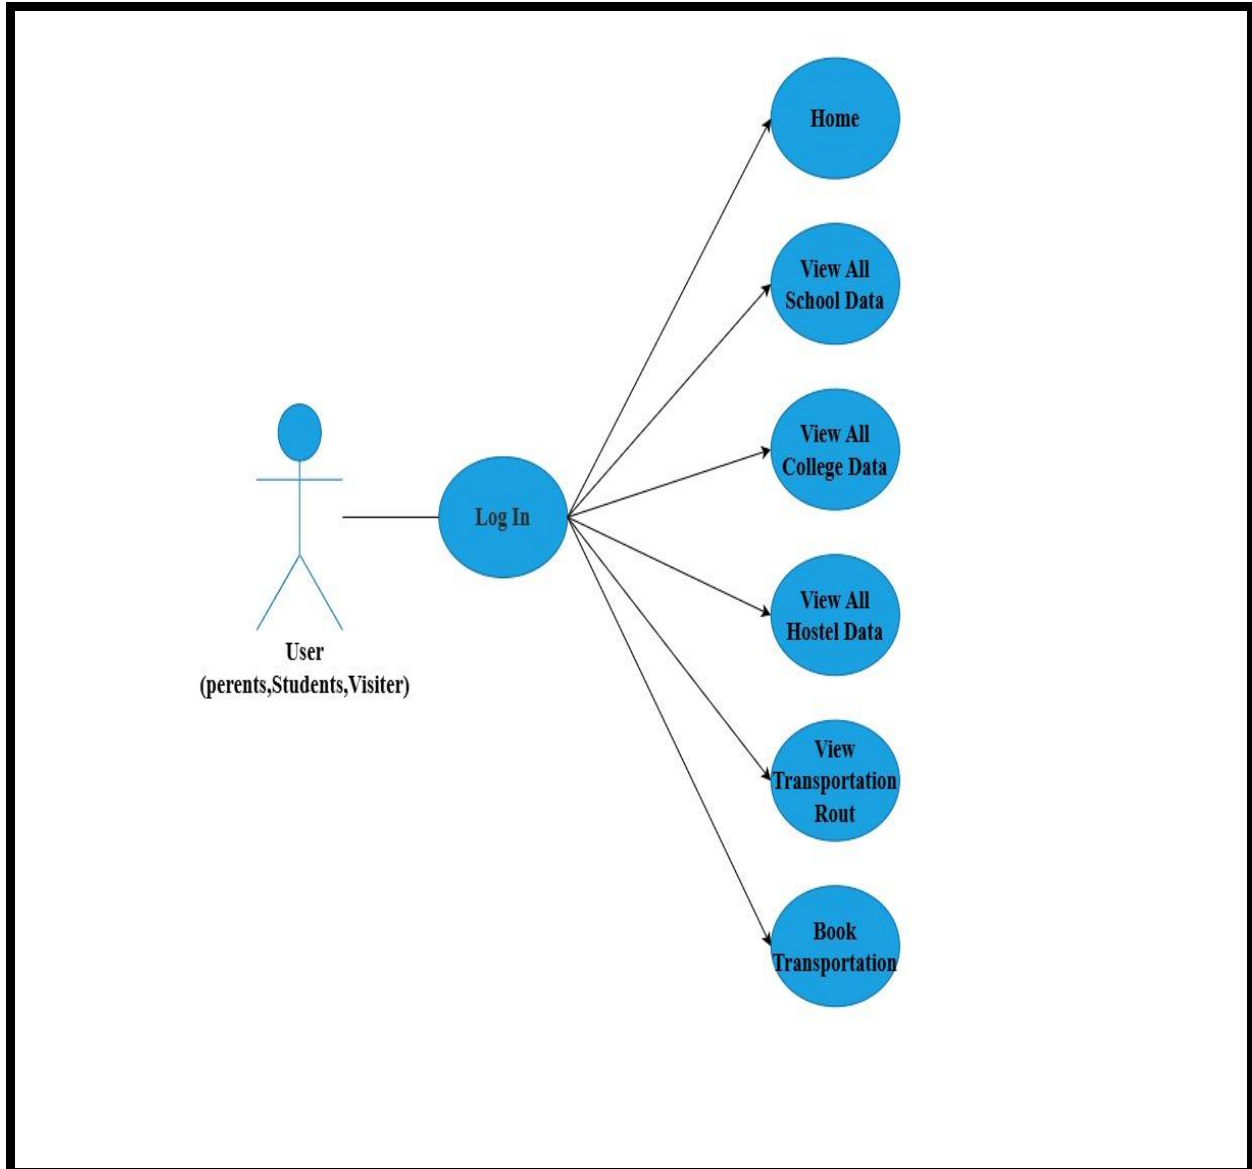

9. 1st level DFD (hostel staff) :-

5.5 Table Structure

1. About us

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Title	Varchar	-	Title of topic
Description	Text	-	Description
Last updated	timestamp	-	Last update of about

2. achievements

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Title	Varchar	-	Title of topic
Description	Text	-	Description
Image	Varchar	-	Image of achievements
Date	Date	-	Date of achievements

3.admin

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Username	Varchar	-	Username of admin
Password	Varchar	-	Password of admin

4.buses

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Bus number	Varchar	-	Number of buses
Route	Varchar	-	Route of buses
Pickup points	Varchar	-	Pickup points of buses
Timings	Varchar	-	Timing of buses
Fees	decimal	-	Fees of buses

5.attendance

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Student id	Varchar	-	Id of student
Date	Date	-	Date of attendance
status	Enum(present, absent)	-	Status of attendance

6.courses

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Title	Varchar	-	Title of courses
Semester	varchar	-	Details of semester
Description	Text	-	Description of courses
Duration	varchar	-	Duration of courses

7.cexam_schedule

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Courses	Varchar	-	Courses of exam
Semester	Text	-	Semester of college schedule
Subject	Varchar	-	College exam subject
Exam date	Date	-	Exam date
Exam time	Time	-	Exam time
venue	Varchar	-	Venue of exam
Supervisor id	int	-	Id of exam schedule

8.cgallery

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Image	Varchar	-	Image of college
category	Varchar	-	Category of college
Description	Text	-	Description of gallery

9.class_timetables

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Teacher id	Int	-	-
Standard	Varchar	-	Standard of class
Day	-	-	Time tables of days
Start time	Time	-	Start time of class
End time	Time	-	End time of class
Subject	Varchar	-	Subject of class time tables

10.college_fees

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Courses	Varchar	-	Courses of fees
Semester	Int	-	Semester of college fees
Registration fees	Decimal	-	College fees of registration
Tuition fees	Decimal	-	Tuition fees
Hostel fees	Decimal	-	Hostel fees

11.complaint form

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Admission id	Varchar	-	Admission id of form
Issue type	Varchar	-	Issue of complaint form
description	Text	-	Description
Complaint date	-	-	Complaint date
answer	text	-	Answer of form

12.contact_form

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
First name	Varchar	-	Add to first name in form
Last name	Varchar	-	Add to last name in form
phone	Varchar	-	Phone number of contact
Email	Varchar	-	Email address
message	Text	-	Message box
Submitted at	-	-	Submitted form

13.contact_messages

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of people
Email	Varchar	-	Email of people
Subject	Varchar	-	Subject of messages
Message	Text	-	Messages
Submitted at	-	-	Submitted form

14.contact_us

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
phone	Varchar	-	Number of people
email	Varchar	-	Email of people
address	text	-	Address of people
Working hours	varchar	-	Working hour of people
Last updated	-	-	Last update of people

15. courses

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Teachers name	Varchar	-	Teacher name
Subject name	Varchar	-	Subject name
Duration	Varchar	-	Duration of courses
Section	-	-	Section of courses
Created at	-	-	Created

16.cstudents

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Student id	Varchar	-	Student id of college
Name	Varchar	-	Name of students
Email	Varchar	-	Email of student
Phone	Varchar	-	Phone of students
Course	Varchar	-	Course of students
Semester	Int	-	Semester
Dob	Date	-	Dob of students
Status	-	-	Status

17.cstudy_materials

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Courses	-	-	Courses of materials
Subject	Varchar	-	Subject of study
Material name	Varchar	-	Material name
File path	Varchar	-	File path details
Uploaded by	Varchar	-	Upload materials
Upload date	Date	-	Fix date of upload

18.ctimetable

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Courses	Varchar	-	Courses of materials
Semester	Int	-	Semester
Day	-	-	Days of time table
Time	Varchar	-	Time of college
Subject	Varchar	-	Subject
Faculty name	Varchar	-	Faculty name of college
Room number	Varchar	-	Room number

19.daily_reports

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Report date	Date	-	Report date of daily
Courses	Varchar	-	Courses details of reports
Total students	Int	-	Total students
Present count	Int	-	Present student
Absent count	Int	-	Absent student

20.exam_schedule

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Exam name	varchar	-	Exam name of schedule
Subject	Varchar	-	Subject
Class	Varchar	-	Class wise schedule
Exam date	Date	-	Exam date
Exam time	Time	-	Exam time
Staff id	Int	-	Staff id

21.facility

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Title	Varchar	-	Title of facility
Description	Text	-	Description of facility
Image	Varchar	-	Image of facility

22.facility_requests

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of facility request
Email	Varchar	-	Email
Phone	Varchar	-	Phone number
Bus id	Int	-	Bus id in details
Pickup point	Varchar	-	Point details in facility
Created at	-	-	Created

23. faculty

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of faculty
Email	Varchar	-	Email of faculty
Phone	Varchar	-	Phone of faculty
Qualification	Varchar	-	Qualification of faculty
Field	-	-	Field of faculty
Designation	Varchar	-	Designation of faculty
Experience	Int	-	Experience
Contact	Varchar	-	Contact of faculty
Image	Varchar	-	Image

24.fees

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Student id	Varchar	-	Student id
Amount	Decimal	-	Amount of fees
Paid	Decimal	-	Paid
Due	Decimal	-	Due to fees
Status	-	-	Status of fees
Receipt number	Varchar	-	Receipt number of
Payment date	-	-	Payment number of fees

25.fees payment

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Admission id	Varchar	-	Admission id of fees
Payment date	date	-	Payment date
Amount paid	decimal	-	Amount paid

26.fees_structure

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Standard	Varchar	-	Standard of fees
Registration fees	Decimal	-	Registration fees
Composite fees	Decimal	-	Composite fees
Hostel fees	Decimal	-	Hostel fees
Frequency	-	-	Frequency

27.gallery

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Category	Varchar	-	Category of gallery
image	Varchar	-	Image
Description	Text	-	description

28.food schedule

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Days	Varchar	-	Day of food
Morning snacks	Varchar	-	Morning food schedule
Breakfast	Varchar	-	Breakfast
Lunch	Varchar	-	Lunch
Evening snacks	Varchar	-	Evening snacks
Dinner	Varchar	-	Dinner
Late night snacks	Varchar	-	Late night snacks

29. girls_hostel_rules

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Title	Varchar	-	Title of hostel
Rule text	text	-	Rule of text

30. hostel attendance

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Admission id	Varchar	-	Admission id
Date	Date	-	Date
Status	Varchar	-	Status

31.hostel contact

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Hostel contact of name
Email	Varchar	-	Email
Phone	Varchar	-	Phone
Message	test	-	Message of hostel contact
Date	Date	-	Date
status	Varchar	-	status

32.hostel facilities

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
icon	Varchar	-	Icon of facility
Title	Varchar	-	Title
Description	Text	-	Description

33.hostel fees

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Category	Varchar	-	Category of fees
Standard course	Varchar	-	Course
Room type	Varchar	-	Room type fees
Fees	decimal	-	Fees

34.hostel student

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of student
Email	Varchar	-	Email of student
School college	Varchar	-	Student details
Class	Varchar	-	Class details
Room type	Varchar	-	Room type of details
Contact	Varchar	-	Contact of student
Guardian name	Varchar	-	Name
Guardian contact	Varchar	-	Contact
Admission id	Varchar	-	Admission id
Status	-	-	Status
Created at	-	-	Created

35.leave application

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Admission id	Varchar	-	Admission id
reason	Text	-	Reason of application
Form date	Date	-	From of date
To date	Date	-	To date
Applied date	-	-	Applied date
Leave status	Varchar	-	Leave status

36. Message :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
image	Varchar	-	Image
message	text	-	Message display
name	Varchar	-	Name of message
role	Varchar	-	Role of message

37. Mess Rule

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
title	varchar	-	Title of rules
rule_text	text	-	Rule of message

38. Notice :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Autoi ncrement
title	varchar	-	Title of notice
description	text	-	Description of notice
timestamp	Datetime	-	Cuurent date

39. Payments

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Student_id	Varchar	-	Student_id
Student_name	Varchar	-	Student name
course	varchar	-	Student courses
semester	int	-	Student semester
amount	double	-	Fees amount
Payment_method	varchar	-	Fees payment method
Payment_status	varchar	-	Payment status
Payment_date	date	-	Date of payment

40. Placement :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary Key	Auto increment
Student_name	varchar	-	Name of student
company	varchar	-	Name of company
package	double	-	Salary of package
year	int	-	year

41. Rooms

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
image	varchar	-	image
Room_type	varchar	-	Room of types
capacity	int	-	Capacity of student
description	text	-	Description of room

42. room allocation :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Admission id	Varchar	-	Admission id
room_no	Int	-	Room no
Alloction_date	Date	-	Room alloction of date

43. room_number

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Room_no	int	-	Room no
Room_type	Varchar	-	Types of room
status	Varchar	-	Status of room

44. Rules

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Title	varchar	-	Title of rules
description	text	-	Description of rules

45 . scholarships

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Title	Varchar	-	Title of scholarships
Description	Text	-	Description of scholarship
Amount	Decimal	-	Amount of scholarships
Course	Enum	-	courses
Type	Enum	-	Types of scholarships
trending	tinyint	-	Trending scholarship

46. schoolnotice :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Content	text	-	Content of notice
Date_posted	date	-	Notice posted date

47. school_admin:-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Username	Varchar	-	Name of user
Password	Varchar	-	Password
email	varchar	-	Email of user

48. staff

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of teacher
Email	Varchar	-	Email of teacher
Contact	Varchar	-	Contact of teacher
Qualification	Varchar	-	Qualification of teacher
Role	Enum	-	Role of teacher
Image	Varchar	-	Image
Date-added	datetime	-	Date

49. Staff_login

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of teacher
Email	Varchar	-	Email of teacher
Contact	Varchar	-	Contact of teacher
Qualification	Varchar	-	Qualification of teacher
Role	Enum	-	Role of teacher
Image	Varchar	-	Image
Date-added	datetime	-	Date
password	varchar	-	password

50. student

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Student_id	Varchar	-	Student id
Full_name	Varchar	-	Name of student
Dob	Date	-	Date of birth
Contact	Varchar	-	Contact of student
Email	Varchar	-	Email of student
Address	Text	-	Address of student
Standard	Enum	-	Standard of student
Stream	Enum	-	Stream of student
Admission_date	Timestamp	-	Admission date
Admission_confirmed	tinyint	-	Confirmed/ pending

51. student_matrinal:-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
standard	Enum	-	Standard of student
stream	Enum	-	Stream of student
Material_name	Varchar	-	Material name
Material_link	Varchar	-	Material link
student_id	int	-	Student id

52. Support_satff :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of staff
Photo	Varchar	-	Photo
Contact	Varchar	-	Contact od staff
Duty role	Varchar	-	Duty role
Shift_time	varchar	-	Time of shift

52. Users :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of user
email	Varchar	-	Email of user
Password	Varchar	-	Password of user
Role	enum	-	Role of user
Reset_token	varchar	-	Reset token

53. visitor

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of staff
Contact	Varchar	-	Contact of visitor
Email	Varchar	-	Email of visitor
Purpose	Text	-	Purpose of date
Visit_date	Datetime	-	Date of visit
status	enum	-	Status

54. visitor_guidelines :-

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Icon	varchar	-	Icon of guidelines
guideline	Text	-	Visitor guidelines

55. visitor_report

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Visitor_id	Int	-	Visitors id
Name	Varchar	-	Nam of visitor
Contact	Varchar	-	Contact of visitors
Email	varchar	-	Email of visitor
purpose	Text	-	Visitor purpose
Visit_date	Date	-	Visit date
Status	Varchar	-	Visit status
Approved_date	timestamp	-	date

56. warden

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of teacher
photo	Varchar	-	Photo
Contact	varchar	-	Contact of warden
Designation	Varchar	-	Designation
Qualification	Varchar	-	qualification
password	varchar	-	password

57. college_admin

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Username	Varchar	-	Name of user
Email	Varchar	-	Email of user
password	varchar	-	Password

58. faculty_login

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Name	Varchar	-	Name of tacher
Email	Varchar	-	email
Phone	Varchar	-	phone number
Qualification	Varchar	-	Qualification of faculty
designation	Varchar	-	Designation of faculty
Experience	Int	-	Experience
Field	Varchar	-	Filed of faculty
Image	Varchar	-	Image
password	varchar	-	password

59. hostel_admin

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Username	Varchar	-	User name
Password	Varchar	-	password
email	varchar	-	Email

60. main admin

Column Name	Data Type	Constraints	Description
Id	Int	Primary key	Auto increment
Username	Varchar	-	User name
Password	Varchar	-	password
email	varchar	-	Email
name	varchar	-	name

5. upload material

The screenshot shows the 'Add Study Material' form in the School staff Admin Panel. The form is titled 'Add Study Material' and is located under the 'Study Details' section. It contains the following fields:

- Select Standard:** A dropdown menu with 'Nursery' selected.
- Select Stream (For Class 11-12 Only):** A dropdown menu with 'None' selected.
- Material Name:** A text input field.
- Upload Material (File):** A file upload area with a 'Choose File' button and the text 'No file chosen'.

At the bottom of the form is a large purple button labeled 'ADD MATERIAL'.

6. manage material

The screenshot shows the 'View Study Materials' page in the School staff Admin Panel. The page is titled 'Existing Study Materials' and features a search bar and a table of materials.

Search Bar: A search bar with the placeholder text 'Search materials...' and a 'Search' button.

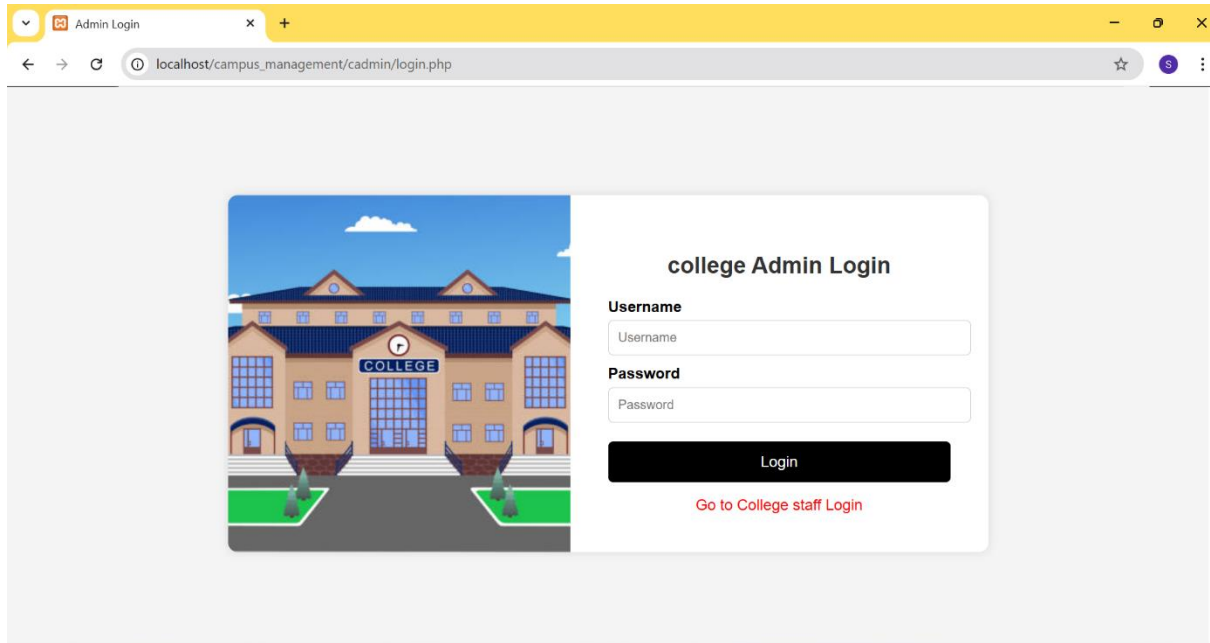

Table: A table with 4 columns: Standard, Stream, Material Name, and Download. It contains 3 rows of data.

Standard	Stream	Material Name	Download
12	Commerce	maths	Download
11	Commerce	Hindi	Download
11	Commerce	maths	Download

At the bottom of the table is a pagination bar with 'Previous', '1', and 'Next' buttons.

CHAPTER: 7

Future Enhancement & conclusion

7.1 Future Enhancement of the system

7.2 Conclusion

7.1 FUTURE ENHANCEMENT OF THE SYSTEM

- The **Girls Campus Management System** is designed to streamline school, college, and hostel operations.
- To further improve efficiency, security, and user experience, several enhancements can be introduced.
- These enhancements will leverage modern technologies like AI, automation, and digital transformation to create a more advanced and user-friendly system.
- A smart chatbot to assist students and staff with queries related to classes, schedules, fees, and exams.
- The introduction of a smart attendance system using RFID or biometric technology will eliminate manual attendance marking, making the process faster and more accurate.
- Option to switch between multiple languages for better accessibility and user convenience.
- AI-driven timetable generation to avoid scheduling conflicts and optimize classroom and faculty allocation.
- A centralized repository for video lectures, e-books, assignments, and interactive quizzes for students.
- A secure system to track hostel visitors with digital check-in/check-out and visitor verification.
- A digital request system for students to schedule laundry services and report maintenance issues.

7.2 CONCLUSION

The **Campus Management System** streamlines and enhances the administration of schools, colleges, and hostels by integrating various modules such as student management, staff management, course management, attendance tracking, exam handling, and study material distribution. This system provides a **centralized platform** that improves efficiency, reduces manual work, and ensures smooth communication between students, faculty, and administration.

By digitizing key processes, it minimizes paperwork, ensures data security, and enhances accessibility. The system's user-friendly interface allows easy navigation for students, staff, and administrators. Additionally, the inclusion of features such as exam scheduling, results management, and study material uploads makes it a **comprehensive solution** for modern educational institutions.

In conclusion, the **Campus Management System** contributes significantly to the **digital transformation** of educational institutions, improving operational efficiency and offering a seamless experience for all stakeholders. Future enhancements can include AI-based analytics for student performance tracking, mobile app integration, and automated notifications to further enhance engagement and productivity.
