

Set: A

BACHELOR OF COMPUTER APPLICATION_SEM_V**2011000105050001 ASP.NET (505)****Time: One Hour****Max. Marks: 50****Instructions:**

- All questions are Compulsory
- Each question for **One Mark**

- Which Asp.Net object can load multiple data tables inside it?
(A)DataReader (B)DataSet (C)DataContainer (D)DataCollection
- What is assembly?
(A)It is collection of the class (B)It is collection of files (C)It is collection of logical data (D)It is collection of images structures
- In Query String, multiple query strings variables can be specified in the URL by separating them _____.
(A); (B)@ (C), (D)&
- Which validation control is used to make TextBox control compulsory to enter from the user?
(A)RegualrExpression Validator (B)Validation Summary (C)RequiredField Validator (D)Compare Validator
- How to handle unstructured error?
(A)On Error GoTo (B)Try..Catch..Finally (C)Throwable (D)GoTo Jump
- Which of the following method is used to kill the session object?
(A)Abort (B)Die (C)Abandon (D)Destroy
- Which of the following event of global class is used to handle application error?
(A)WebSite_Error() (B)Application_Error() (C)Application_Error_Detect() (D)Application_Error()
- The scope of the query string variable is _____.
(A)Limited to the four pages (B)Limited to the current page (C)Limited to the target page (D)The whole ASP.NET application
- Main difference between CSS file and Skin file is _____.
(A)CSS is used for designing controls whereas, Skin is used for designing body (B)Both are used for web page body designing (C)CSS is used for designing web page body whereas, Skin is used for designing controls (D)There is no difference between CSS and Skin files
- Which webserver is developed by Microsoft?
(A)Apache (B)Webrick (C)IIS (D)Caudium
- Which of the following method is used to redirect user from one web page to another?
(A)Response.Direction() (B)Response.Redirect() (C)Response.Direct() (D)Response.Move()
- Main advantage of Master page is _____.
(A)Common database format for all tables (B)Common look and feel of web forms design (C)Common look and feel of CSS design (D)Common and centralized control of only menu control
- Which property of the web page is used to check whether post back occurred or not?
(A)IsPostUrlBack (B)PostBackDone (C)PostClientBack (D)IsPostBack
- Web.config file is used _____.
(A)To maintain the database related operations (B)To store global information and variable definitions for application (C)To store local information and query string settings for application (D)To maintain the programming language classes and functions
- Which control is used to display data in the list format?
(A)DataList (B)GridView (C)Adrotator (D)Literal

16 Which method is invoked to load dataset with data?

- (A)Load() (B)DataBind() (C)Fill() (D)DataSet()

17 Which is the extension of User Control?

- (A).ascx (B).asmx (C).asax (D).aspx

18 Which method of the DataTable object is used to load data from DataReader?

- (A)Fill() (B)Store() (C)Load() (D)Save()

19 Which of the following is necessary element for connection object?

- (A)connection string (B)connection state (C)connection memory (D)connection storage

20 Which of the following is responsible for converting the different .NET programming language syntactical rules and regulations into CLR understandable format?

- (A)Namespace (B)CTS (C)JIT (D)CLS

21 Which of the following block is always executed?

- (A)Try (B)Catch (C)Finally (D)Throwable

22 ListBox can act as a DropDownList if _____property is set to single

- (A)SelectedItem (B)SelectionOption (C)SelectionSelect (D)SelectionMode

23 Which of the following application folder is used to store information of web services?

- (A)Web_References (B)App_GlobalResources (C)Web_GlobalResources (D)App_WebReferences

24 What is inline code style in Asp.net?

- (A)Design and programming language codes are in different files (B)Design and programming language codes are in same file (C)Design and programming language codes separated in html file (D)Design and programming language codes are in sql file

25 Which prefix is used for access database?

- (A)sql (B)oledb (C)oleaccess (D)access

26 Which property of the Regular Expression Validator is set for DataType?

- (A)DataType (B)DataOption (C)Options (D)Type

27 Asp.Net _____

- (A)Does not support any event programming (B)Is an Event less programming (C)Does not able to handle the event (D)Is an Event driven programming

28 By default, ASP.NET store sessionIDs in _____

- (A)Cache (B)ViewState (C)Cookie (D)DataBase

29 Which of the following object is used to build command?

- (A)Command creator (B)Command line (C)Command generator (D)Command builder

30 What is full form of ASP?

- (A)Active Site Page (B)Active Server Pages (C)Activated Server Page (D)Activate Server Post

31 How much time the session value is stored by default?

- (A)20 minutes (B)10 minutes (C)30 minutes (D)15 minutes

32 What is full form of UDDI?

- (A)Universal Description, Data and Integration (B)Universal Detail, Discovery and Integration (C)Unnamed Description, Detail and Integration (D)Universal Description, Discovery and Integration

33 Which is the first event of the Asp.Net web form?

- (A)Page_Init() (B)Page_PreInit() (C)Page_PreLoad() (D)Page_Load()

34 Common datatypes of .Net framework is covered in _____

- (A)CTS (B)CTT (C)CTM (D)CTR

35 Which file is created to design sitemap?

- (A).config (B).sitemap (C).sql (D).client

36 Which facility is used to maintain user specific information?

- (A)User Information (B)User Detail (C)User Profile (D)User Data

37 What is ASP.NET?

- (A) Client-side web-application framework designed for web application development
(B) Client-side web-application framework designed for desktop application development
(C) Server-side web-application framework designed for web application development
(D) Server-side web-application framework designed for desktop application development

38 Which of the following is not client side state management technique?

- (A) HiddenField (B) ViewState (C) Session (D) Cookies

39 Which method of the DataReader returns single value?

- (A) ExecuteNonQuery (B) ExecuteScalar (C) ExecuteSingle (D) ExecuteQuery

40 Which of the following code snippet is used to set expiry date of cookies after one year from today's date?

- (A) cookie.Expire = DateTime.Now.Years(1)
(B) cookie.Expire = DateTime.Now.AddYears(1)
(C) cookie.Expires = DateTime.CurrentDate.AddYears(1)
(D) cookie.Expires = DateTime.Now.AddYears(1)

41 Which state management technique is used to send value form one page to another page in Asp.Net?

- (A) Variable (B) ViewState (C) ViewState (D) QueryString

42 _____ provides a bridge between the front end controls and the back end database

- (A) ADD.NET (B) ACTIVEX.NET (C) ADO.NET (D) ACTIVE.NET

43 Which of the following statement is True?

- (A) Asp.Net is client side scripting language
(B) Asp.Net supports concepts of object oriented programming
(C) Asp.Net is used for development of database programming
(D) Asp.Net does not support concepts of object oriented programming

44 Using which of the following attribute, HTML elements are transformed to HTML server control?

- (A) runat="client" (B) runat="browser" (C) runat="server" (D) runat="host"

45 Which extension is used for master page in Asp.Net?

- (A) .masterpage (B) .masterwebform (C) .mastar (D) .master

46 Which of the following application folder is used to create database?

- (A) App_DataWebsite (B) App_DataBase (C) App_DataObjects (D) App_Data

47 Which of the following object stores value globally?

- (A) ViewState (B) Application (C) QueryString (D) HiddenField

48 Which of the following file contains information of web services?

- (A) UDDI (B) WSLI (C) UDUI (D) WSDL

49 What is full form of ADO?

- (A) ActiveX Data Objects (B) Active Data Objects (C) Action Data Oriented (D) ActiveX Datatable Objects

50 Full form of CLR is _____

- (A) Common Labels Run (B) Common Language Runtime (C) Common Language Runnable (D) Command Language Runtime

Set: B

BACHELOR OF COMPUTER APPLICATION_SEM_V

2011000105050001 ASP.NET (505)

Time: One Hour

Max. Marks: 50

Instructions:

- All questions are Compulsory
- Each question for **One Mark**

- Using which of the following attribute, HTML elements are transformed to HTML server control?
(A)runat="client" (B)runat="browser" (C)runat="server" (D)runat="host"
- Which of the following is responsible for converting the different .NET programming language syntactical rules and regulations into CLR understandable format?
(A)Namespace (B)CTS (C)JIT (D)CLS
- Web.config file is used _____
(A)To maintain the database related operations (B)To store global information and variable definitions for application (C)To store local information and query string settings for application (D)To maintain the programming language classes and functions
- Which property of the Regular Expression Validator is set for DataType?
(A)DataType (B)DataOption (C)Options (D)Type
- Which Asp.Net object can load multiple data tables inside it?
(A)DataReader (B)DataSet (C)DataContainer (D>DataCollection
- By default, ASP.NET store sessionIDs in _____
(A)Cache (B)ViewState (C)Cookie (D)DataBase
- Which extension is used for master page in Asp.Net?
(A).masterpage (B).masterwebform (C).mastar (D).master
- Common datatypes of .Net framework is covered in _____
(A)CTS (B)CTT (C)CTM (D)CTR
- Which of the following method is used to redirect user from one web page to another?
(A)Response.Direction() (B)Response.Redirect() (C)Response.Direct() (D)Response.Move()
- What is full form of UDDI?
(A)Universal Description, Data and Integration (B)Universal Detail, Discovery and Integration (C)Unnamed Description, Detail and Integration (D)Universal Description, Discovery and Integration
- Which of the following object is used to build command?
(A)Command creator (B)Command line (C)Command generator (D)Command builder
- Main difference between CSS file and Skin file is _____
(A)CSS is used for designing controls whereas, Skin is used for designing body (B)Both are used for web page body designing (C)CSS is used for designing web page body whereas, Skin is used for designing controls (D)There is no difference between CSS and Skin files
- Which of the following code snippet is used to set expiry date of cookies after one year from today's date?
(A)cookie.Expire = DateTime.Now.Years(1) (B)cookie.Expire = DateTime.Now.AddYears(1) (C)cookie.Expires = DateTime.CurrentDate.AddYears(1) (D)cookie.Expires = DateTime.Now.AddYears(1)
- What is inline code style in Asp.net?
(A)Design and programming language codes are in different files (B)Design and programming language codes are in same file (C)Design and programming language codes separated in html file (D)Design and programming language codes are in sql file
- Which method of the DataTable object is used to load data from DataReader?

- (A) Fill() (B) Store() (C) Load() (D) Save()
- 16 Which webserver is developed by Microsoft?
 (A) Apache (B) Webrick (C) IIS (D) Caudium
- 17 _____ provides a bridge between the front end controls and the back end database
 (A) ADD.NET (B) ACTIVEX.NET (C) ADO.NET (D) ACTIVE.NET
- 18 Which of the following statement is True?
 (A) Asp.Net is client side scripting language (B) Asp.Net supports concepts of object oriented programming (C) Asp.Net is used for development of database programming (D) Asp.Net does not support concepts of object oriented programming
- 19 Which control is used to display data in the list format?
 (A) DataList (B) GridView (C) Adrotator (D) Literal
- 20 Which prefix is used for access database?
 (A) sql (B) oledb (C) oleaccess (D) access
- 21 Which state management technique is used to send value form one page to another page in Asp.Net?
 (A) Variable (B) StateView (C) ViewState (D) QueryString
- 22 How to handle unstructured error?
 (A) On Error GoTo (B) Try..Catch..Finally (C) Throwable (D) GoTo Jump
- 23 What is assembly?
 (A) It is collection of the class (B) It is collection of files (C) It is collection of logical data structures (D) It is collection of images
- 24 What is full form of ADO?
 (A) ActiveX Data Objects (B) Active Data Objects (C) Action Data Oriented (D) ActiveX Datatable Objects
- 25 Which of the following object stores value globally?
 (A) ViewState (B) Application (C) QueryString (D) HiddenField
- 26 Which of the following event of global class is used to handle application error?
 (A) WebSite_Error() (B) Application_Error() (C) Application_Error_Detect() (D) Application_Error()
- 27 Which of the following is not client side state management technique?
 (A) HiddenField (B) ViewState (C) Session (D) Cookies
- 28 Which property of the web page is used to check whether post back occurred or not?
 (A) IsPostBack (B) PostBackDone (C) PostClientBack (D) IsPostBack
- 29 Which of the following is necessary element for connection object?
 (A) connection string (B) connection state (C) connection memory (D) connection storage
- 30 Asp.Net _____
 (A) Does not support any event programming (B) Is an Event less programming (C) Does not able to handle the event (D) Is an Event driven programming
- 31 Which file is created to design sitemap?
 (A) .config (B) .sitemap (C) .sql (D) .client
- 32 ListBox can act as a DropDownList if _____ property is set to single
 (A) SelectionItem (B) SelectionOption (C) SelectionSelect (D) SelectionMode
- 33 Which method is invoked to load dataset with data?
 (A) Load() (B) DataBind() (C) Fill() (D) DataSet()
- 34 Which of the following method is used to kill the session object?
 (A) Abort (B) Die (C) Abandon (D) Destroy
- 35 Main advantage of Master page is _____
 (A) Common database format for all tables (B) Common look and feel of web forms design (C) Common look and feel of CSS design (D) Common and centralized control of only menu control
- 36 The scope of the query string variable is _____

(A)Limited to the four pages (B)Limited to the current page (C)Limited to the target page (D)The whole ASP.NET application

37 Which method of the DataReader returns single value?

(A)ExecuteNonQuery (B)ExecuteScalar (C)ExecuteSingle (D)ExecuteQuery

38 What is ASP.NET?

(A)Client-side web-application framework designed for web application development (B)Client-side web-application framework designed for desktop application development (C)Server-side web-application framework designed for web application development (D)Server-side web-application framework designed for desktop application development

39 Which of the following application folder is used to create database?

(A)App_DataWebsite (B)App_DataBase (C)App_DataObjects (D)App_Data

40 Which facility is used to maintain user specific information?

(A)User Information (B)User Detail (C)User Profile (D)User Data

41 Which is the extension of User Control?

(A).ascx (B).asmx (C).asax (D).aspx

42 What is full form of ASP?

(A)Active Site Page (B)Active Server Pages (C)Activated Server Page (D)Activate Server Post

43 Which validation control is used to make TextBox control compulsory to enter from the user?

(A)RegualrExpression Validator (B)Validation Summary (C)RequiredField Validator (D)Compare Validator

44 Which is the first event of the Asp.Net web form?

(A)Page_Init() (B)Page_PreInit() (C)Page_PreLoad() (D)Page_Load()

45 Which of the following application folder is used to store information of web services?

(A)Web_References (B)App_GlobalResources (C)Web_GlobalResources (D)App_WebReferences

46 Which of the following block is always executed?

(A)Try (B)Catch (C)Finally (D)Throwable

47 Full form of CLR is _____

(A)Common Labels Run (B)Common Language Runtime (C)Common Language Runnable (D)Command Language Runtime

48 In Query String, multiple query strings variables can be specified in the URL by separating them _____

(A); (B)@ (C), (D)&

49 How much time the session value is stored by default?

(A)20 minutes (B)10 minutes (C)30 minutes (D)15 minutes

50 Which of the following file contains information of web services?

(A)UDDI (B)WSLL (C)UDUI (D)WSDL

Set: C

BACHELOR OF COMPUTER APPLICATION_SEM_V

2011000105050001 ASP.NET (505)

Time: One Hour

Max. Marks: 50

Instructions:

- All questions are Compulsory
- Each question for **One Mark**

1 What is full form of ASP?

- (A)Active Site Page (B)Active Server Pages (C)Activated Server Page (D)Activate Server Post

2 What is inline code style in Asp.net?

- (A)Design and programming language codes are in different files (B)Design and programming language codes are in same file (C)Design and programming language codes separated in html file (D)Design and programming language codes are in sql file

3 How to handle unstructured error?

- (A)On Error GoTo (B)Try..Catch..Finally (C)Throwable (D)GoTo Jump

4 Which file is created to design sitemap?

- (A).config (B).sitemap (C).sql (D).client

5 Which facility is used to maintain user specific information?

- (A)User Information (B)User Detail (C)User Profile (D)User Data

6 Which of the following object stores value globally?

- (A)ViewState (B)Application (C)QueryString (D)HiddenField

7 Full form of CLR is _____

- (A)Common Labels Run (B)Common Language Runtime (C)Common Language Runnable (D)Command Language Runtime

8 Which property of the web page is used to check whether post back occurred or not?

- (A)IsPostBack (B)PostBackDone (C)PostClientBack (D)IsPostBack

9 Which of the following method is used to redirect user from one web page to another?

- (A)Response.Direction() (B)Response.Redirect() (C)Response.Direct() (D)Response.Move()

10 Which of the following statement is True?

- (A)Asp.Net is client side scripting language (B)Asp.Net supports concepts of object oriented programming (C)Asp.Net is used for development of database programming (D)Asp.Net does not support concepts of object oriented programming

11 What is full form of ADO?

- (A)ActiveX Data Objects (B)Active Data Objects (C>Action Data Oriented (D)ActiveX Datatable Objects

12 Which is the extension of User Control?

- (A).ascx (B).asmx (C).asax (D).aspx

13 Which of the following file contains information of web services?

- (A)UDDI (B)WSLL (C)UDUI (D)WSDL

14 Which extension is used for master page in Asp.Net?

- (A).masterpage (B).masterwebform (C).mastar (D).master

15 Web.config file is used _____

- (A)To maintain the database related operations (B)To store global information and variable definitions for application (C)To store local information and query string settings for application (D)To maintain the programming language classes and functions

16 Which of the following method is used to kill the session object?

- (A)Abort (B)Die (C)Abandon (D)Destroy
- 17 _____ provides a bridge between the front end controls and the back end database
- (A)ADD.NET (B)ACTIVE.NET (C)ADO.NET (D)ACTIVE.NET
- 18 Which validation control is used to make TextBox control compulsory to enter from the user?
- (A)RegualrExpression Validator (B)Validation Summary (C)RequiredField Validator (D)Compare Validator
- 19 Which is the first event of the Asp.Net web form?
- (A)Page_Init() (B)Page_PreInit() (C)Page_PreLoad() (D)Page_Load()
- 20 Which of the following event of global class is used to handle application error?
- (A)WebSite_Error() (B)Application_Error() (C)Application_Error_Detect() (D)Application_Error()
- 21 Which method of the DataReader returns single value?
- (A)ExecuteNonQuery (B)ExecuteScalar (C)ExecuteSingle (D)ExecuteQuery
- 22 Which state management technique is used to send value form one page to another page in Asp.Net?
- (A)Variable (B)StateView (C)ViewState (D)QueryString
- 23 The scope of the query string variable is _____
- (A)Limited to the four pages (B)Limited to the current page (C)Limited to the target page (D)The whole ASP.NET application
- 24 Common datatypes of .Net framework is covered in _____
- (A)CTS (B)CTT (C)CTM (D)CTR
- 25 What is full form of UDDI?
- (A)Universal Description, Data and Integration (B)Universal Detail, Discovery and Integration (C)Unnamed Description, Detail and Integration (D)Universal Description, Discovery and Integration
- 26 Which of the following code snippet is used to set expiry date of cookies after one year from today's date?
- (A)cookie.Expire = DateTime.Now.Years(1) (B)cookie.Expire = DateTime.Now.AddYears(1) (C)cookie.Expires = DateTime.CurrentDate.AddYears(1) (D)cookie.Expires = DateTime.Now.AddYears(1)
- 27 What is ASP.NET?
- (A)Client-side web-application framework designed for web application development (B)Client-side web-application framework designed for desktop application development (C)Server-side web-application framework designed for web application development (D)Server-side web-application framework designed for desktop application development
- 28 Which prefix is used for access database?
- (A)sql (B)oledb (C)oleaccess (D)access
- 29 Which of the following application folder is used to store information of web services?
- (A)Web_References (B)App_GlobalResources (C)Web_GlobalResources (D)App_WebReferences
- 30 Using which of the following attribute, HTML elements are transformed to HTML server control?
- (A)runat="client" (B)runat="browser" (C)runat="server" (D)runat="host"
- 31 Which of the following object is used to build command?
- (A)Command creator (B)Command line (C)Command generator (D)Command builder
- 32 Asp.Net _____
- (A)Does not support any event programming (B)Is an Event less programming (C)Does not able to handle the event (D)Is an Event driven programming
- 33 Which method is invoked to load dataset with data?
- (A)Load() (B)DataBind() (C)Fill() (D)DataSet()
- 34 Which of the following block is always executed?
- (A)Try (B)Catch (C)Finally (D)Throwable
- 35 Main difference between CSS file and Skin file is _____

- (A) CSS is used for designing controls whereas, Skin is used for designing body (B) Both are used for web page body designing (C) CSS is used for designing web page body whereas, Skin is used for designing controls (D) There is no difference between CSS and Skin files

36 Which method of the DataTable object is used to load data from DataReader?

- (A) Fill() (B) Store() (C) Load() (D) Save()

37 Which of the following is not client side state management technique?

- (A) HiddenField (B) ViewState (C) Session (D) Cookies

38 Which property of the Regular Expression Validator is set for DataType?

- (A) DataType (B) DataOption (C) Options (D) Type

39 Which webserver is developed by Microsoft?

- (A) Apache (B) Webrick (C) IIS (D) Caudium

40 Which of the following application folder is used to create database?

- (A) App_DataWebsite (B) App_DataBase (C) App_DataObjects (D) App_Data

41 Which Asp.Net object can load multiple data tables inside it?

- (A) DataReader (B) DataSet (C) DataContainer (D) DataCollection

42 What is assembly?

- (A) It is collection of the class (B) It is collection of files (C) It is collection of logical data structures (D) It is collection of images

43 How much time the session value is stored by default?

- (A) 20 minutes (B) 10 minutes (C) 30 minutes (D) 15 minutes

44 Which control is used to display data in the list format?

- (A) DataList (B) GridView (C) Adrotator (D) Literal

45 In Query String, multiple query strings variables can be specified in the URL by separating them _____

- (A); (B)@ (C), (D)&

46 Which of the following is responsible for converting the different .NET programming language syntactical rules and regulations into CLR understandable format?

- (A) Namespace (B) CTS (C) JIT (D) CLS

47 ListBox can act as a DropDownList if _____ property is set to single

- (A) SelectionItem (B) SelectionOption (C) SelectionSelect (D) SelectionMode

48 Which of the following is necessary element for connection object?

- (A) connection string (B) connection state (C) connection memory (D) connection storage

49 By default, ASP.NET store sessionIDs in _____

- (A) Cache (B) ViewState (C) Cookie (D) DataBase

50 Main advantage of Master page is _____

- (A) Common database format for all tables (B) Common look and feel of web forms design (C) Common look and feel of CSS design (D) Common and centralized control of only menu control

Set: D

BACHELOR OF COMPUTER APPLICATION_SEM_V

2011000105050001 ASP.NET (505)

Time: One Hour

Max. Marks: 50

Instructions:

- All questions are Compulsory
- Each question for **One Mark**

1 Using which of the following attribute, HTML elements are transformed to HTML server control?

- (A)runat="client" (B)runat="browser" (C)runat="server" (D)runat="host"

2 Which of the following is responsible for converting the different .NET programming language syntactical rules and regulations into CLR understandable format?

- (A)Namespace (B)CTS (C)JIT (D)CLS

3 Which of the following object is used to build command?

- (A)Command creator (B)Command line (C)Command generator (D)Command builder

4 Which validation control is used to make TextBox control compulsory to enter from the user?

- (A)RegualrExpression Validator (B)Validation Summary (C)RequiredField Validator (D)Compare Validator

5 What is inline code style in Asp.net?

- (A)Design and programming language codes are in different files (B)Design and programming language codes are in same file (C)Design and programming language codes separated in html file (D)Design and programming language codes are in sql file

6 Which of the following method is used to redirect user from one web page to another?

- (A)Response.Direction() (B)Response.Redirect() (C)Response.Direct() (D)Response.Move()

7 Which method of the DataReader returns single value?

- (A)ExecuteNonQuery (B)ExecuteScalar (C)ExecuteSingle (D)ExecuteQuery

8 In Query String, multiple query strings variables can be specified in the URL by separating them _____

- (A); (B)@ (C), (D)&

9 Full form of CLR is _____

- (A)Common Labels Run (B)Common Language Runtime (C)Common Language Runnable (D)Command Language Runtime

10 What is assembly?

- (A)It is collection of the class (B)It is collection of files (C)It is collection of logical data structures (D)It is collection of images

11 By default, ASP.NET store sessionIDs in _____

- (A)Cache (B)ViewState (C)Cookie (D)DataBase

12 What is ASP.NET?

- (A)Client-side web-application framework designed for web application development (B)Client-side web-application framework designed for desktop application development (C)Server-side web-application framework designed for web application development (D)Server-side web-application framework designed for desktop application development

13 What is full form of ADO?

- (A)ActiveX Data Objects (B)Active Data Objects (C>Action Data Oriented (D)ActiveX Datatable Objects

14 Which of the following code snippet is used to set expiry date of cookies after one year from today's date?

- (A)cookie.Expire = DateTime.Now.Years(1) (B)cookie.Expire = DateTime.Now.AddYears(1) (C)cookie.Expires = DateTime.CurrentDate.AddYears(1) (D)cookie.Expires = DateTime.Now.AddYears(1)

15 Which of the following statement is True?

- (A) Asp.Net is client side scripting language (B) Asp.Net supports concepts of object oriented programming (C) Asp.Net is used for development of database programming (D) Asp.Net does not support concepts of object oriented programming
- 16 Which method is invoked to load dataset with data?
 (A) Load() (B) DataBind() (C) Fill() (D) DataSet()
- 17 Which of the following application folder is used to store information of web services?
 (A) Web_References (B) App_GlobalResources (C) Web_GlobalResources (D) App_WebReferences
- 18 Which file is created to design sitemap?
 (A) .config (B) .sitemap (C) .sql (D) .client
- 19 Which facility is used to maintain user specific information?
 (A) User Information (B) User Detail (C) User Profile (D) User Data
- 20 Which of the following event of global class is used to handle application error?
 (A) WebSite_Error() (B) Application_Error() (C) Application_Error_Detect() (D) Application_Error()
- 21 Main difference between CSS file and Skin file is _____
 (A) CSS is used for designing controls whereas, Skin is used for designing body (B) Both are used for web page body designing (C) CSS is used for designing web page body whereas, Skin is used for designing controls (D) There is no difference between CSS and Skin files
- 22 How to handle unstructured error?
 (A) On Error GoTo (B) Try..Catch..Finally (C) Throwable (D) GoTo Jump
- 23 Which of the following object stores value globally?
 (A) ViewState (B) Application (C) QueryString (D) HiddenField
- 24 Web.config file is used _____
 (A) To maintain the database related operations (B) To store global information and variable definitions for application (C) To store local information and query string settings for application (D) To maintain the programming language classes and functions
- 25 What is full form of ASP?
 (A) Active Site Page (B) Active Server Pages (C) Activated Server Page (D) Activate Server Post
- 26 Which webserver is developed by Microsoft?
 (A) Apache (B) Webrick (C) IIS (D) Caudium
- 27 Which of the following file contains information of web services?
 (A) UDDI (B) WSLL (C) UDUI (D) WSDL
- 28 The scope of the query string variable is _____
 (A) Limited to the four pages (B) Limited to the current page (C) Limited to the target page (D) The whole ASP.NET application
- 29 Which is the extension of User Control?
 (A) .ascx (B) .asmx (C) .asax (D) .aspx
- 30 Main advantage of Master page is _____
 (A) Common database format for all tables (B) Common look and feel of web forms design (C) Common look and feel of CSS design (D) Common and centralized control of only menu control
- 31 What is full form of UDDI?
 (A) Universal Description, Data and Integration (B) Universal Detail, Discovery and Integration (C) Unnamed Description, Detail and Integration (D) Universal Description, Discovery and Integration
- 32 Which of the following application folder is used to create database?
 (A) App_DataWebsite (B) App_DataBase (C) App_DataObjects (D) App_Data
- 33 Which of the following is necessary element for connection object?
 (A) connection string (B) connection state (C) connection memory (D) connection storage
- 34 Which method of the DataTable object is used to load data from DataReader?

- (A) Fill() (B) Store() (C) Load() (D) Save()
- 35 ListBox can act as a DropDownList if _____ property is set to single
- (A) SelectionItem (B) SelectionOption (C) SelectionSelect (D) SelectionMode
- 36 Which of the following block is always executed?
- (A) Try (B) Catch (C) Finally (D) Throwables
- 37 _____ provides a bridge between the front end controls and the back end database
- (A) ADD.NET (B) ACTIVEX.NET (C) ADO.NET (D) ACTIVE.NET
- 38 Common datatypes of .Net framework is covered in _____
- (A) CTS (B) CTT (C) CTM (D) CTR
- 39 Which property of the web page is used to check whether post back occurred or not?
- (A) IsPostBack (B) PostBackDone (C) PostClientBack (D) IsPostBack
- 40 Which control is used to display data in the list format?
- (A) DataList (B) GridView (C) Adrotator (D) Literal
- 41 Asp.Net _____
- (A) Does not support any event programming (B) Is an Event less programming (C) Does not able to handle the event (D) Is an Event driven programming
- 42 Which Asp.Net object can load multiple data tables inside it?
- (A) DataReader (B) DataSet (C) DataContainer (D) DataCollection
- 43 How much time the session value is stored by default?
- (A) 20 minutes (B) 10 minutes (C) 30 minutes (D) 15 minutes
- 44 Which state management technique is used to send value form one page to another page in Asp.Net?
- (A) Variable (B) ViewState (C) ViewState (D) QueryString
- 45 Which property of the Regular Expression Validator is set for DataType?
- (A) DataType (B) DataOption (C) Options (D) Type
- 46 Which is the first event of the Asp.Net web form?
- (A) Page_Init() (B) Page_Prenit() (C) Page_PreLoad() (D) Page_Load()
- 47 Which of the following method is used to kill the session object?
- (A) Abort (B) Die (C) Abandon (D) Destroy
- 48 Which prefix is used for access database?
- (A) sql (B) oledb (C) oleaccess (D) access
- 49 Which of the following is not client side state management technique?
- (A) HiddenField (B) ViewState (C) Session (D) Cookies
- 50 Which extension is used for master page in Asp.Net?
- (A) .masterpage (B) .masterwebform (C) .mastar (D) .master
